EDITOR'S PREFACE	3
FROM THE PREFACE TO THE SECOND EDITION	5
PREFACE TO THIRD EDITION	6
PRELIMINARY REMARKS	9
I. SETS AND THE COMBINING OF SETS	11
§ 1. Sets	11
§ 2. Functions	15
§ 3. Sum and Intersection	18
§ 4. Product and Power	23
II. CARDINAL NUMBERS	28
§ 5. Comparison of Sets	28
§ 6. Sum, Product, and Power	33
§ 7. The Scale of Cardinal Numbers	37
§ 8. The Elementary Cardinal Numbers	41
III. ORDER TYPES	48
§ 9. Order	48
§ 10. Sum and Product	51
§ 11. The Types \aleph_0 and \aleph	57
IV. ORDINAL NUMBERS	65
§ 12. The Well-Ordering Theorem	65
§ 13. The Comparability of Ordinal Numbers	68
§ 14. The Combining of Ordinal Numbers	73
§ 15. The Alefs	81
§ 16. The General Concept of Product	85
V. SYSTEMS OF SETS	90
§ 17. Rings and Fields	90
§ 18. Borel Systems	96
§ 19. Suslin Sets	105

VI. POINT SETS	109
§ 20. Distance	109
§ 21. Convergence	119
§ 22. Interior Points and Border Points.....	127
§ 23. The α , β , and γ Points	130
§ 24. Relative and Absolute Concepts	139
§ 25. Separable Spaces	143
§ 26. Complete Spaces	149
§ 27. Sets of the First and Second Categories	159
§ 28. Spaces of Sets	166
§ 29. Connectedness	172
VII. POINT SETS AND ORDINAL NUMBERS	188
§ 30. Hulls and Kernels	188
§ 31. Further Applications of Ordinal Numbers.....	198
§ 32. Borel and Suslin Sets	203
§ 33. Existence Proofs	206
§ 34. Criteria for Borel Sets	210
VIII. MAPPINGS OF TWO SPACES	221
§ 35. Continuous Mappings	221
§ 36. Interval-Images	228
§ 37. Images of Suslin Sets	236
§ 38. Homeomorphism	242
§ 39. Simple Curves	249
§ 40. Topological Spaces	257
IX. REAL FUNCTIONS	264
§ 41. Functions and Inverse Image Sets	264
§ 42. Functions of the First Class	280
§ 43. Baire Functions	291
§ 44. Sets of Convergence	305
X. SUPPLEMENT	312
§ 45. The Baire Condition	312
§ 46. Half-schlicht Mappings	326
APPENDIXES	336
BIBLIOGRAPHY	340
FURTHER REFERENCES	342
INDEX	347
