

Index

- Abel's integral equation, 190
- Absolute stability, 111
- Approximate solution, 32
- Ascoli–Arzelà lemma, 30
- Asymptotic stability, 87
- Autonomous systems, 69

- Behavior of saturated solutions, 46
- Bernolli equation, 16
- Bessel
 - equation, 82, 178, 181
 - function, 179
 - inequality, 145
- Bihari lemma, 15
- Boundary value conditions, 164
- Boundary value problem, 171
- Bounded differential system, 104
 - solution, 91, 104, 127

- Cayley theorem, 78
- Characteristic equation, 79
 - of the servomotor, 110
 - polynomial, 79
 - roots, 76

- Classification of trajectories, 72
- Comparison equation, 51
- Comparison method (principle), 50
- Conti theorem, 52
- Continuable solution, 40
- Cycle, 72

- Dependence of solution on
 - initial values, 46
- Differential
 - equation, 1
 - complex, 36
 - exact, 10
 - first order, 19
 - higher order, 27
 - with separable variables, 7
 - inequality, 49
 - linear, 7
 - systems, 24, 29

- Eigenfunction, 146, 165
- Eigenvalue, 146, 165
- Emission zone, 187
- Existence of eigenvalues, 158

- Existence of Liapunov function, 108
- Exponential asymptotic stability, 93
 - function of a matrix, 75
- Fourier coefficients, 145
- Fredholm, Ivar, 133
 - entire functions, 138
 - equation (*see* Integral equation)
- Functional equation, 1
- Fundamental matrix, 64
 - period, 72
 - system of solutions, 62
- Global asymptotic stability, 107
- Global existence, 43, 52, 53
 - uniqueness, 40, 41
- Green's function, 167
- Gronwall's inequality, 15
 - generalized, 17
- Hadamard's inequality, 138
- Hermitian kernel, 155
- Hilbert space, 145
- Hilbert-Schmidt expansion theorem, 160
- Hukuhara theorem, 189
- Hurwitz criterion, 94
- Implicit functions, 2
- Inner product, 142
- Instability, 103
- Integral equation, 1
 - adjoint, 148
 - Fredholm, 133, 153
 - Hammerstein, 153
 - resolvent kernel, 136
 - Volterra, 119, 125
 - singular, 152
- Integral funnel, 187
- Integral inequality, 14, 15
- Integral operator, 126, 155
 - boundedness, 156
- Integrating factor, 7, 11
- Integro-differential equation, 153
- Jordan theorem, 75
- Kernel, 125
 - adjoint, 148
 - complete, 163
 - degenerate, 152
 - hermitian, 155
 - positive, 171
 - resolvent, 125, 136
 - symmetric, 163
 - Volterra type, 125
- Lagrange stability, 104
- Leighton, Walter, 178
- Liapunov function, 99
 - decreasing, 99
 - negative definite, 99
 - positive definite, 99
- Liapunov's first theorem on stability, 101
 - second theorem on instability, 104
- Liénard's equation, 182
 - existence of a cycle, 183
- Linear
 - control system, 83
 - dependent solutions, 67
 - differential equation, 5, 66
 - with constant coefficients, 79
 - independent solutions, 68
- Linear system
 - homogeneous, 58
 - nonhomogeneous, 58, 64
 - with constant coefficients, 73
- Liouville's formula, 63, 68
- Lipschitz condition, 24, 27
 - local, 39, 40
- Lur'e, A. I., 110
- Massera theorem, 176
- Matrix function, 58
- Maximal (maximum)
 - solution, 14, 174
- Minimal (minimum)
 - solution, 14, 174
- Norm of an element, 143
 - matrix, 58
 - operator, 156

- Norm of an element (continued)
vector, 25, 75
- Orthonormal sequence (system), 145
complete, 164
- Oscillation theorem, 178
- Osgood uniqueness theorem, 35
- Peano's existence theorem, 30, 33
- Peano–Kneser theorem, 187
- Periodic solution, 73, 176, 182
- Persidski's theorem on
uniform stability, 101
- Perturbed system, 95
- Phase space, 73
- Picone's formula, 179, 180
- Poincaré–Liapunov theorem, 97
- Postnikov, V. N., 110
- Pre-Hilbert space, 145
- Quasi-polynomial, 77
- Riccati equation, 16
- Saturated solution, 40
in the future, 45
- Scalar product, 142
- Schmidt orthogonalization
method, 146
- Schrodinger, E., 4
- Schwarz inequality, 143
- Singular point, 72
- Stability, 85, 86, 89
in the large (*see* Global
asymptotic stability)
- Sturm's comparison theorem, 180
- Sturm–Liouville problem, 164
- Successive approximations, 20, 120,
128, 134
- Sylvester procedure, 112
- System of differential equations
(*see* Differential system, Auton-
omous system, Linear system)
- System of the first approximation, 95
- Trajectory, 71
- Triangle inequality, 143
- Uniform asymptotic stability, 87
stability, 86
- Uniqueness problem, 2, 12
- Van der Pol's equation, 186
- Variation of parameters,
method of, 65
- Variational system, 54
- Vector function, 25
- Ważewski's inequality, 81
- Wintner, A., 53, 168
- Wronski determinant, 63
