

INDEX

- Abel, N., 100
- Abel power series theorem, 100
- Abelian group, 29
- Abelian integral, 277
- Absolute convergence, 97, 227, 251
- Absolute value, 6
- Accessible boundary point, 319
- Accumulation point, 9
- Addition theorem, for doubly periodic function, 264
 - for exponential function, 66
 - for \wp -function, 264
 - for sine and cosine, 79
- Algebraic singularity, 216
- Analytic continuation, 213–24
 - direct, 214
 - of Γ -function, 280
- Analytic function, 1
 - complete analytic function, 215
 - defined by integral, 136
 - singularities, 149–55
 - uniqueness theorem, 139
- Angle, between two rays, 16
 - between two vectors, 2
- Angular defect, 57
- Arbitrary rectifiable curve, 120
- Arc, 108
- Arc $\cos z$, 87, 91
- Arc $\cot z$, 86
- Arc length, 50, 111
- Arc $\sin z$, 87
- Arc $\tan z$, 86
- Argument, 6, 11, 74
- Argument principle, 175–81, 314
- Asymptotic value, 66
- Automorphic function, 271, 337
- Axioms, field, 3
 - for plane Euclidean geometry, 2
 - for two-dimensional vector space, 1
- Basis, of a group, 126
 - of vector plane, 2
- Bernoulli numbers, 182, 293
- Bieberbach area theorem, 183
- Bilinear, form, 3
 - transformation, 37
- Binomial equation, 23
- Binomial series, 136
- Blaschke product, 239
- Bólyai, 50
- Bolzano-Weierstrass theorem, 20
- Boundary correspondence, of domain
 - bounded by analytic curve, 319
 - under conformal mapping, 315
- Boundary elements, 319
- Boundary point, 10, 313
- Branch points, 27, 268
 - of the surface, 163
- Branches, 25
- c -points, 33
- Carathéodory, Constantin, 143, 309
- Cartesian coordinate system, 3
- Cauchy, Augustin, 14
- Cauchy convergence criterion, 96, 110, 157, 207
- Cauchy integral formula, 131–5, 168
 - consequences, 138–46
 - derivation for disk, 131
 - general form, 133–5
- Cauchy product rule, 98, 105, 290

- Cauchy theorem, 117–27, 167
 - general form, 125, 208
- Cauchy-Riemann differential equations, 12–14, 29
 - and conjugate harmonic functions, 190
 - polar form, 22
 - and reflection principle, 221
- Chain rule, 15, 157
- Circle of Apollonius, 39
- Circle of convergence, 100
- Circular arcs, 51
- Circular domain, 45, 47, 49, 145
- Circular neighborhood, 9, 27
- Circular triangle, 58
 - conformal mapping, 166, 335–6
- Closed domain, 10
- Closed path, 108
- Closed plane, 9
- Closed set, 9
- Closure, 10
- Cluster point, 9, 318, 339
- Commutative group, 29
- Compact set, 9
- Complement, 9
- Complete analytic function, 215
- Complex conjugate, 7, 19, 54
- Complex line integral, 108–14
- Complex number notation, 6
- Complex plane, 6
- Composition of functions, 15
- Conditional convergence, 97
- Conformal function, 16
- Conformal mapping, 37, 73, 305–43
 - by analytic functions, 15
 - of circular domains, 45
 - construction of solution, 308–15
 - and Dirichlet problem, 325
 - and harmonic functions, 190
 - of Jordan domain, 179, 324
 - of polygon, 328, 332
 - of rectangle, 335
 - by schlicht function, 162
 - self-mapping, 49
 - of triangle, 332–5
 - of unit disk, 47, 145, 195
- Conjugate groups, 124
- Conjugates, harmonic, 15, 190
- Connectivity number, 126
- Continuity, 10
- Continuation, *see* Analytic continuation
- Continuous deformation, 123
- Continuum, 9
- Contour lines, 51
- Convergence, absolute, 97, 227
 - circle of, 102
 - conditional, 97
 - radius of, 102
 - uniform, 99
- Convergence criterion, 97
 - and infinite products, 225
- Convergent sequence, 8
- Convergent series, 95
- Convex domain, 120, 216
- Cosine, 78
- Cotangent, 82
- Covering surface, 27
- Cross-ratio, 37
- Cycle, 49, 51
- Cyclic group, 28
- Cyclic permutation, 185, 272
- Decomposition, into partial fractions, 33
 - into real and imaginary parts, 29
- Definite integral, 115
- Deformation, 122, 128–30
- Derivative, 11
 - of exponential function, 68
- Differentiability, 11
- Differentiable function, 11
- Differential, 11
 - equation of $\varphi(z)$, 261
- Dimension, 1
- Direct analytic continuation, 214
- Dirichlet problem, 204–6, 211
 - and conformal mapping, 325
- Displacement vector, 44
- Domain, 9
 - closed, 10
- Doubly periodic functions, 243, 335
 - addition theorem for, 264
 - representation of, 259, 262
- Element of an analytic function, 214
- Elementary deformation, 122

- Elliptic functions, 243, 246
 Elliptic integral, 262–75
 Elliptic modular function, 339
 Elliptic transformation, 43, 48, 51
 Entire function, 68, 78, 258, 287
 Equicontinuous functions, 165, 165.3
 Equivalence relation, 122
 Equivalent, 69
 Equivalent boundary elements, 320
 Erdős, P., 300
 Essential singularity, 150, 216, 245
 Euler, Leonhard, 135
 Euler's constant, 286
 Euler's formulas, 67, 82, 223
 Euler's Γ -function, 278–304
 Euler's integral, 278
 Euler's product formula, 289, 295, 301
 Even functions, 262
 Exponential function, 65–73, 92, 105
 asymptotic values of, 66
 extension into complex domain, 65
 periodicity, 68
 reduction of simply periodic functions to, 244
 Extended plane, 9
 Exterior point, 10
 Fixed points, 42
 Fresnel integrals, 181
 Function, analytic, *see* Analytic function
 composition of, 15
 conformal, 16
 defined, 10
 harmonic, 14, 184–91, 321
 integral, 68
 inverse, 155–62, 179, 217
 monotone, 324
 Function element, 214
 Fundamental domain, 72
 Fundamental group, 123
 Fundamental period, 244
 Fundamental theorem, of algebra, 29, 142, 177
 of differential calculus, 186

 Γ -function, 171
 analytic continuation, 280
 Γ -function—*cont.*
 and factorial, 279
 product representation, 285
 Gauss, Carl Friedrich, 135, 300
 Gauss mean-value theorem, 135, 140, 195, 209, 236
 General power, 73
 Geodesic, 49
 Goursat, Édouard, 14
 Goursat's proof, 118, 189
 Graph, *see* Line-complex
 Green's function, 325, 342
 Group, cyclic, 28
 finite, 28
 of integral values, 125
 postulates, 28

 Hadamard, J., 300
 Hadamard's three-circle theorem, 211
 Hardy, G. H., 299
 Harmonic conjugates, 15, 190
 Harmonic continuation, 219
 Harmonic functions, 14, 184–91, 321
 Harmonic measure, 197, 321
 Harmonic sequence, 41
 Harnack's principle, 206, 240, 312
 Heine-Borel theorem, 21, 108
 Hermite's method, 292
 Homeomorphic mapping, 145
 Homomorphism, 124
 Homothetic transformation, 43
 Homotopic, 122
 Homotopy, 122, 126, 128
 classes, 123
 Hyperbolic geometry, 48
 Hyperbolic length, 49
 Hyperbolic measure, 337
 Hyperbolic transformation, 43, 48, 50
 Hypercycle, 48, 51

 Image of a domain, 160
 Indirectly conformal, 18
 Infinite connectivity, 126
 Infinite products, 225–8, 286
 Integral, 108
 theorem of Cauchy, 131

- Integral function, 68
- Integrability condition, 115, 187
- Integration of a differential form, 184
- Inversion, 45
- Involutory transformation, 43
- Isomorphism, 124
- Iteration method, 309
- Jensen's formula, 236–9
- Jordan arc, 108, 199, 323, 341
- Jordan curve, 108, 177, 200, 314, 324, 341
 - theorem, 178
- Jordan domain, 325, 341
- Kernel, 196
- Klein, Felix, 338
- Koebe, Paul, 309
- Landau, E., 299
- Laplace differential equation, 14, 21
 - polar form, 22
- Laplace integrals, 171, 173
- Laurent expansion, 146
 - derivation, 146, 151, 236
 - series, 167
- de La Vallée Poussin, C., 300
- Legendre, A. M., 299
- Legendre modular function, 271, 338, 343
 - normal form, 274
- Legendre relations, 256
- Leibniz, 12
- Length, 2
- Limit, of a function, 10
 - point, 9
 - of a sequence, 8, 138
