

## INDEX

- Abel, N. H., 351  
Absolute maximum, 9, 270  
Absolute minimum, 270  
Absolute value, 112, 310  
Addition of positive integers, 75  
Additive inverse, 106  
Adjunction of roots, 362  
Algebra, fundamental theorem of, 331  
  of sets, 25, 29  
Algebraic (complex), number, 337  
  equations in fields, 200  
  field extensions, 353, 365  
  integer, 351 (Ex. 4), 387  
  number field, 353  
  number theory, 386  
  over a field, 337  
  real number, 288  
  system, 55  
  (See also Simple algebraic extension)  
Algebraically closed field, 337, 373  
Algebraically dependent, 373 (Ex. 8)  
Algorithm, 10, 204, 285  
  division, 131, 212  
  Euclidean, 135, 236  
Analytic function, 333  
Analytic geometry, 186  
Analytic number theory, 386  
Analytical basis of the trigonometric  
  functions, 400  
Angle, 309, 374, 400  
Antecedent, 11  
Antisymmetric law, 33, 83  
Antisymmetric relation, 44  
Archimedean ordering, 236  
Archimedean property, 235  
Argand diagram, 318  
Argument of a complex number, 313  
Associative law, 33, 75, 80, 105  
  generalized, 94, 125  
Axiom, 3  
  of abstraction, 393  
  of choice, 18, 35, 100 (Ex. 5), 396  
  of extensionality, 392  
  of infinity, 65, 395  
  of Peano systems, 65  
  of restricted set formation, 393  
  of set-existence, 393  
Axiomatic set theory, 23, 391  
  
Basis, linearly independent, 366, 369  
Bernays, P., 391  
Binary, function, 50  
  operation, 50  
  relation, 43  
  representation of real numbers, 259  
Binomial expansion, 127, 287  
Bi-unique function, 53  
Bolzano-Weierstrass theorem, for the  
  complex numbers, 324  
  for the real numbers, 243  
Boolean algebra, 32  
Bound variable, 14  
Bounded, from above, 232  
  from below, 232  
  sequence, 243, 324  
  
Calculus, fundamental theorem of, 401  
Cancellation law, 77, 80, 105, 108  
Cantor, G., 391  
Cantor's (diagonal) method, 289, 293  
Cantor's ternary set, 301 (Ex. 1)  
Cardan, G., 346  
Cardinal number, 57  
Cartesian, plane, 374  
  product, 37, 394  
Cauchy, A. L., 229, 239  
Cauchy sequence, 242  
Characteristic of an integral domain,  
  157 (Ex. 7)  
Characterization of the positive inte-  
  gers, 72, 89  
Choice, axiom of, 18, 35, 100 (Ex. 5),  
  396

- Circle, 374
  - of convergence, 333
- Class, 14
- Classical construction problems, 381
- Closure under an operation, 50
- Coefficient, leading, 167
- Coefficients, of a polynomial, 159, 167
  - of a system of equations, 202
- Collection, 14
- Commutative law, 33, 77, 80, 105
  - generalized, 94, 125
- Commutative ring with unity, 104
- Complement of a set, 25, 394
- Complex, conjugate, 306
  - (*See also* Fundamental theorem of complex algebra)
  - numbers, 1, 303, 306
- Composition of functions, 52
- Composition of relations, 43
- Computation, of roots of complex polynomials, 334
  - of roots of real polynomials, 275
  - (*See also* Effective computation procedure)
- Conclusion of an implication, 11
- Condition, 5, 393
  - necessary and sufficient, 12
  - with one free variable, 15
  - with several free variables, 15, 36
- Congruence, class, 153
  - modulo an integer, 152
  - modulo a polynomial, 359
  - relation, 50
  - relations in a field, 191
  - relations in the integers, 147
- Conjugate, complex, 306
- Connectives, logical, 10
- Connectivity law, 83
- Consequent, 11
- Constant, 5
- Constant polynomial, 167
- Constructible numbers, 378
- Constructions, ruler and compass, 376
- Continued-fractions representation, 261, 267 (Ex. 5)
- Continuous function, of complex numbers, 327
  - of real numbers, 9, 267
- Continuously ordered field, 235
- Continuously ordered system, 226
- Contradiction, proof by, 12
- Convergence, circle of, 333
  - radius of, 263
  - uniform, 287 (Ex. 3)
- Convergent sequence, 241, 324
- Convergent series, 256
- Converse of a relation, 39, 41, 52
- Coordinates, 374
- Correspondence, one-to-one, 53
- Cos (cosine), 309, 317, 400
- Countable set, 292
- Course-of-values induction, 140
- Cubic equations, roots of, 346
- Cut, 227
- Cycle, 130 (Ex. 2)
- Decimal representation, 257
- Dedekind, R., 65, 229, 387
- Dedekind section, 399
- Degree of a polynomial, 167, 173
- de la Vallée Poussin, C. J., 387
- De Moivre's theorem, 318
- De Morgan's laws, 34
- Densely ordered system, 190
- Denumerable set, 291
- Derivative of a function, 400
- Derivative of a polynomial, formal, 168
- Determinant, 204
- Diagonal method, Cantor's, 289, 293
- Dimension, 369
- Diophantine problems, 155
- Direct predecessor, 87
- Direct successor, 87
- Discriminant, 342
- Disjoint sets, 29
- Distance, 246, 255
- Distributive law, 33, 78, 105
  - generalized, 97, 125
- Divergent series, 256
- Divisibility relation, between integers, 133
  - between polynomials, 167, 210
  - in an integral domain, 183
- Division algorithm, for integers, 131
  - for polynomials, 212
- Domain, integral, 101, 108
- Domain of a relation, 39, 394
- Duality of statements, 33, 105
- Duplication of the cube, 381
- Effective computation procedure, 285
- Eisenstein's theorem, 386 (Ex. 4)

- Elementary symmetric polynomial, 176
- Element of a set, 16
- Empty sequence, 124
- Empty set, 22, 392
- Entire function, 333
- Equality; *see* Identity
- Equations, algebraic, 200
  - cubic, 346
  - of degree higher than four, 350
  - fourth degree, 349
  - polynomial, in the rationals, 208
  - quadratic, 274, 308
  - solvability of, by radicals, 345, 351
  - systems of linear, 201
- Equinumerous sets, 57
- Equivalence, logical, 12
  - relation, 44
  - sets, 46
  - set-theoretical, 57, 290
- Erdős, P., 387
- Essentially finite sequence, 160
- Euclid, 229
- Euclidean algorithm, for integers, 135
  - for polynomials, 216
- Euclidean plane, 374
- Euclidean space, 327
- Eudoxus, 229
- Euler's function, 383
- Even integer, 133
- Eventually repeating representation, 261
- Exchange condition, 368
- Existence statements, 7
- Existence theorems, for continuously ordered fields, 251
  - for continuously ordered systems, 229
  - for fields of quotients, 192
  - for ordered integral domains, 115, 119
  - for simple transcendental extensions, 163
- Exponential function, 264, 322 (Ex. 13), 333
- Exponentiation, 81, 107, 127, 189, 285
- Extended, intersection of sets, 34
  - products, 93, 124
  - sums, 93, 124
  - union of sets, 34, 393
- Extension(s) of a field, 355, 365
  - finite, 369
  - iterated finite, 371
  - linearly generated, 366
  - simple, 356
  - simple algebraic, 357
  - simple transcendental, 160, 289, 357
- Extensionality, axiom of, 392
- Factor, 133
- Factorization of integers into primes, 139
- Factorization of real polynomials, 335
- Factorization theorem, unique, for integers, 142
  - for polynomials, 217
- Fermat prime, 383
- Fermat's "last theorem," 21, 387
- Ferrari, 346
- Ferro, S., 346
- Field(s), 183, 187
  - algebraically closed, 337, 373
  - continuously ordered, 235
  - finite, 190
  - finite extensions of, 369
    - generated by a set of elements, 353
    - of quotients, 192
    - of rational forms, 198
  - ordered, 187
- Finite, extension of a field, 369
  - sequence, 91, 124
  - set, 16, 57, 92
- Finite-dimensional vector space, 366
- First element, 85
- Formal derivative of a polynomial, 168
- Fourth degree equations, roots of, 349
- Fraenkel, A., 391
- Free variable, 14
- Function(s), 36, 46, 395
  - bi-unique, 53
  - composition of, 52
  - constant, 167
  - continuous, 9, 267, 327
  - converse of, 52
  - exponential, 264, 322 (Ex. 13), 333
  - general recursive, 285
  - implicit, 48
  - inverse, 53
  - multivalued, 49
  - one-to-one, 53
  - polynomial, 158, 166, 172, 328
  - single-valued, 49
  - trigonometric, 313, 400
- Fundamental sequence, 242, 327, 399

- Fundamental theorem, of calculus, 401  
of complex algebra, 331  
on symmetric polynomials, 178
- Galois theory (of equations), 351, 385
- Gauss, K. F., 331, 350, 383
- Gaussian plane, 318
- gcd, *see* Greatest common divisor
- General recursive function, 285
- Generalized, associative laws, 94, 125  
commutative laws, 94, 125  
distributive laws, 97, 125

- Simple transcendental extension, 160, 289, 357
- Simply ordered system, 83
- Sin (sine), 309, 317, 400
- Single-valued function, 49
- Solutions of a system of linear equations, 202
- Solvability of an equation by radicals, 345, 350, 385
- Space, Euclidean, 327
- Square root of  $(-1)$ , 306
- Square roots of complex numbers, 307
- Squaring a circle, 385
- Statement, existence, 7
  - mathematical, 4, 10
- Sturm sequence, 280
- Sturm's theorem, 278, 281, 334
- Subdomain, 108
  - ordered, 111
- Subfield, 187, 353
  - ordered, 187
- Subsequence, 243, 324
- Subset, 20
- Subsystem, 58, 151
- Subtraction, 105
- Successor, direct, 87
- Successor operation, 64
- Sums, extended, 93, 124
- Supremum (sup), 232
- Symmetric law, 21
- Symmetric polynomials, 174, 339
  - elementary, 176
  - fundamental theorem on, 178
- Symmetric relation, 44
- Synthetic geometry, 186
- System, algebraic, 55
  - continuously ordered, 226
  - densely ordered, 190
  - mathematical, 55
  - Peano, 64

- simply ordered, 83  
 well ordered, 85, 123, 139  
 Systems of linear equations, 201, 206
- Tarski, A., 335  
 Tartaglia, 346  
 Taylor's theorem, 263  
 Term of an ordered pair, 38  
   a sequence, 92  
 Ternary relation, 42  
 Ternary set, Cantor's, 301 (Ex. 1)  
 Topology, 246, 255, 327  
 Topologically complete, 246, 255  
 Total degree (of a polynomial in several variables), 173  
 Totalities, 14  
 Transcendental, real number, 288  
   (See also: Simple transcendental extension, 160, 289, 357)  
 Transitive law, 21, 33, 83  
 Transitive relation, 44  
 Transposition, 130 (Ex. 2)  
 Triangle inequality, 113, 310  
 Trichotomy law, 78, 83  
 Trigonometric functions, 313, 400  
 Trigonometric representation of the complex numbers, 317  
 Trisection of an angle, 381  
 Type of a mathematical system, 55
- Unary function, 50  
 Uncountable set, 292
- Uniform convergence, 287 (Ex. 3)  
 Union of sets, 25, 393  
   extended, 34, 393  
 Unique factorization theorem, for integers, 142  
   for polynomials, 217  
 Unit circle, 311  
 Unit, imaginary, 306  
 Unity element, 105  
 Unity,  $n$ th roots of, 320  
 Unordered pair, 392  
 Upper bound, 232  
   least, 232  
 Upper section, 226
- Vacuously true implication, 11  
 Variable, 5, 6, 14  
 Variations of sign, 279  
 Vector space, 366  
 Venn diagram, 26, 29  
 von Neumann, J., 391
- Weierstrass, K. T., 331 (See also: Bolzano-Weierstrass theorem)  
 Weierstrass' Nullstellensatz, 268  
 Well-ordered system, 85, 123, 139
- Zermelo, E., 391  
 Zeros of a polynomial, 166  
 Zeros-theorem; see Weierstrass' Nullstellensatz
