

# Contents

<b>Preface</b>	v
<b>Chapter 1. Definitions and Examples of Complex Manifolds</b>	1
1. Holomorphic Functions	1
2. Complex Manifolds and Pseudogroup Structures	7
3. Some Examples of Construction (or Description) of Compact Complex Manifolds	11
4. Analytic Families; Deformations	18
<b>Chapter 2. Sheaves and Cohomology</b>	27
1. Germs of Functions	27
2. Cohomology Groups	30
3. Infinitesimal Deformations	35
4. Exact Sequences	56
5. Vector Bundles	62
6. A Theorem of Dolbeault (A fine resolution of $\mathcal{O}$ )	73
<b>Chapter 3. Geometry of Complex Manifolds</b>	83
1. Hermitian Metrics; Kähler Structures	83
2. Norms and Dual Forms	92
3. Norms for Holomorphic Vector Bundles	100
4. Applications of Results on Elliptic Operators	102
5. Covariant Differentiation on Kähler Manifolds	106
6. Curvatures on Kähler Manifolds	116
7. Vanishing Theorems	125
8. Hodge Manifolds	134
<b>Chapter 4. Applications of Elliptic Partial Differential Equations to Deformations</b>	147
1. Infinitesimal Deformations	147
2. An Existence Theorem for Deformations I. (No Obstructions)	155
3. An Existence Theorem for Deformations II. (Kuranishi's Theorem)	165
4. Stability Theorem	173
<b>Bibliography</b>	186
<b>Index</b>	189
<b>Errata</b>	193
