

Contents

Translator's Note	<u>v</u>
Preface to the Russian Edition	<u>vii</u>
Chapter I	
Spaces of Type W	<u>1</u>
1. Definitions	<u>1</u>
2. Bounded Operators in Spaces of Type W	<u>12</u>
3. Fourier Transforms	<u>18</u>
4. The Case of Several Variables	<u>25</u>
Chapter II	
Uniqueness Classes for the Cauchy Problem	<u>29</u>
1. Introduction	<u>29</u>
2. The Cauchy Problem in a Topological Vector Space	<u>32</u>
3. The Cauchy Problem for Systems of Partial Differential Equations. The Operator Method.	<u>36</u>
4. The Cauchy Problem for Systems of Partial Differential Equations. The Method of Fourier Transforms	<u>51</u>
5. Examples	<u>60</u>
6. The Connection between the Reduced Order of a System and Its Characteristic Roots	<u>64</u>
7. A Theorem of the Phragmén-Lindelöf Type	<u>80</u>
Appendix 1. Convolution Equations	<u>90</u>
Appendix 2. Equations with Coefficients Which Depend on x	<u>94</u>
Appendix 3. Systems with Elliptic Operators	<u>100</u>
Chapter III	
Correctness Classes for the Cauchy Problem	<u>105</u>
1. Introduction	<u>105</u>
2. Parabolic Systems	<u>111</u>
3. Hyperbolic Systems	<u>126</u>

4. Systems Which Are Petrovskiĭ-Correct	<u>134</u>
5. On the Solutions of Incorrect Systems	<u>156</u>

Chapter IV

Generalized Eigenfunction Expansions	<u>165</u>
1. Introduction	<u>165</u>
2. Differentiation of Functionals of Strongly Bounded Variation	<u>172</u>
3. Differentiation of Functionals of Weakly Bounded Variation	<u>176</u>
4. Existence and Completeness Theorems for the System of Eigenfunctionals	<u>182</u>
5. Generalized Eigenfunctions of Self-Adjoint Operators	<u>189</u>
6. The Structure of the Generalized Eigenfunctions	<u>201</u>
7. Dynamical Systems	<u>206</u>
Notes and References	<u>211</u>
Bibliography	<u>217</u>
Index	<u>221</u>
