- amenable, 305
- approximate diagonal, 310
- approximately square matrix space, ASM, 277
- Archbold–Batty conditions, 247
- Arveson–Hahn–Banach theorem for operator systems, 81
- asymptotic product Banach space, 339
- asymptotic product op spaces, 37
- Auerbach basis, 332
- augmented minimal tensor, 248

- Banach \mathcal{A} -bimodule, 305
- Banach algebra, 305
- Banach approximation property, 193
- Banach limit, 321

- Banach space injective tensor product, 133
- Banach space injective tensor product norm, 133
- Banach space projective tensor product, 119
- Banach–Mazur distance, 243
- bilinear GNS, 160
- Bolzano–Weierstrass theorem, 156
- bounded approximate identity, 307
- bounded approximation property, 203

- Calkin algebra, 266
- canonical complete contraction, 138
- canonical duality mapping, 334
- canonical inclusion, 40
- canonical mapping, 134
- canonical operator space structure, 19
- central vector, 316
- closed matrix unit ball, 18
- column Hilbert operator space, 52
- column Hilbert space, 52
- column index, 4
- column matrix norm, 52
- commutant, 337
- complete isometry, 21
- complete isomorphism, 21
- complete quotient mapping, 21
- completely 1-summing mappings, 230
- completely 1-summing norm, 230
- completely bounded, 21
- completely bounded approximation property, 203
- completely bounded Banach–Mazur distance, 247
- completely bounded cohomology group, 306
- completely bounded linear mapping, 122
- completely bounded norm, 21

- completely contractive, 21
- completely contractive approximation property, 203
- completely contractive Banach algebra, 306
- completely contractive linear mapping, 122
- completely integral mapping, 216
- completely nuclear mappings, 210
- completely positive, 76
- comultiplication, 314
- concrete function algebra, 319
- concrete function space, 17
- concrete operator algebra, 319
- concrete operator space, 18
- concrete operator system, 75
- condition C , 249
- cone, 328
- conjugate operator space, 38
- conjugate space, 333
- contractive approximation property, 203
- convex, 328
- convex combination, 328
- cross matrix norm, 120
- cross-norm, 119
- cyclical permutation matrix, 25

- decomposable mappings, 91
- decomposable norm, 93
- decomposition theorem, 75
- density matrix, 8
- derivation, 305
- diagonal, 309
- diagonal truncation, 24
- direct limit operator space, 37
- direct sum, 3
- dual operator bimodule, 307
- dual operator structure, 43
- dual realization, 42
- dual slice mapping property, 199

- elementary tensor, 3
- essential inclusion, 111
- exact C^* -algebra, 339
- exact approximation constant, 260
- exact complete quotient mapping, 21
- exact general, 261
- exactly integral mappings, 284
- exactly integral norm, 284

- factor through Hilbert space, 235
- factorization, 208
- faithful module, 109
- filter, 340

- fixed ultrafilter, 340
- Fourier algebra, 314
- Fourier-Stieltjes algebra, 317
- free ultrafilter, 340
- function algebra, 319

- GNS representation, 336
- GNS representation theorem, 29

- Haagerup tensor product, 150
- Hilbert space, 333
- Hilbert–Schmidt norm, 7, 13

- identity matrix, 3
- identity, unit, 334
- injective Banach space, 68
- injective Banach tensor product, 118
- injective envelope, 112
- injective matrix norm, 134
- injective operator space, 68
- injective operator system, 103
- injective von Neumann algebras, 338
- inner derivation, 305
- inner product, 333
