

INDEX

(Numbers refer to pages)

- ARISTOTELIAN Logic, 48f
Associative Law of conjunction and disjunction, 7
Axiom, of choice, 130, 156
— of extensionality, 15
— systems of first and second order, 107
Axioms, of predicate calculus, completeness of, 92f, 130
— — independence of, 87
— — of order ω , 155f
— of restricted predicate calculus, 67f
— of second order predicate calculus, 131
- CALCULUS, of classes, 44
Calculus, functional, 165
— predicate, 44, 165
— sentential, 3, 165
Calculus, predicate, derivation of rules and formulas, 71f
— — extended, 125
— — monadic, 44, 119, 132
— — of order ω , 152
— — of second order, 125
— — restricted, 55
— Sentential, 3, 165
Combinations of sentences, logically true, 14
— simplification of, 20
— totality of, 18
— transformation of, 12
Commutative Law of Sentential Calculus, 7
Conjunction, 7
Connectives, fundamental logical, 3
Consistency, problem of, 38, 87f, 111, 158
Constants, individual, 102, 168
Constituents, 19
Contradiction, 167
Contradictory, construction of, in predicate calculus; 80
Convergence, uniform and ordinary, 64
Correspondence, one-to-one, 142
- DECISION Problem, 112f, 132
— reduction theorems in, 118f
Dedekind cut, 158
Deduction of consequences of given axioms, in sentential calculus, 23
— in predicate calculus, 101f
Derivation of rules and formulas, in predicate calculus, 71f
Disjunction, 7
Dispensability of fundamental logical connectives, 10
Distributive laws, of sentential calculus, 7
Domain of Individuals, 68, 102, 105
Dual, 167
Duality Principle, of sentential calculus, 16, 167
— of predicate calculus, 81f
- EITHER—or, 4
Elimination problem in predicate calculus, 132f
Equivalence, set theoretic, 142
Equivalences, sentential, 5f
- FORMULA, definition of, in predicate calculus, 65f
— satisfiable, 113, 129
— universally valid, 68
— valid, 68, 129
- GERMAN letters, use of, 16, 67
Greek letters, use of, 102
- IDENTITY, predicate of, 107, 126
Implication, 7
Individual constants, 102
Individual variable, 65
Individuals, 57
— domain of, 68, 102, 105
Induction, mathematical, 126
Intersection, 46, 142, 143
Italic letters, use of, 65
- JUDGMENTS, Particular, 47, 59, 168
— universal, 45, 58, 168
- LEAST upper bound, theorem of, 160
Level of a predicate, 152f

- Logic, Aristotelian, 48f
 — traditional, 48, 55
 Logical paradoxes, 143f
 NEGATION, formation of, in sentential calculus, 15
 Normal form, conjunctive, in sentential calculus, 12, 17
 — disjunctive, in sentential calculus, 17
 — distinguished conjunctive, 19
 — prenex, 83
 — Skolem, 85
 Number Concept, logical introduction of, 136f
 Numerical equivalence of predicates, 137
 ONE-to-one correspondence, 142
 Or, 4
 Ordering of a set, 143
 PARADOXES, logical, 143f
 Parentheses, elimination of, 6, 66
 Particular Judgments, 47, 58
 Pascal's Theorem, 108
 Predicate, 44
 — level of, 152
 — of second level, 135
 Prefix, 84
Principia Mathematica, 2, 28, 153, 162
 Product, logical, 7
 Proposition, 165, 168
 QUANTIFIER, existential, 59, 125
 — universal, 58, 125
 REAL numbers, foundation of theory of, 158
 Reduction theorems in the decision problem, 118f
 Reflexivity, 135
 Rule of Implication, 28
 Rule of Interchange of Quantifiers, 60, 82
 Rule of Substitution, 79
 Rules for rewriting bound variables, 70
 Rule for Universal and Existential Quantifiers, 70
 Rules of elimination, of sentential calculus, 20
 SATISFIABILITY, problem of, 22, 113, 128
 Scope of a quantifier, 67
 Sentential calculus, axioms of, 27
 — — completeness of, 42
 — — independence of, 40
 — proof of rules and formulas in, 30
 Sequence of Natural Numbers, basic properties of, 61
 Set of all subsets, 142
 Set theory, 139
 Sets, ordered, 143
 — well-ordered, 143
 Sheffer stroke, 11, 29
 Subclass, 46, 142
 Sum, logical, 7
 Syllogisms, 49
 Symmetry, 135
 TAUTOLOGY, 167
 Traditional Logic, 48, 55
 Transitivity, 135
 Theory of types, simple and ramified, 153
 Truth function, 5
 Truth tables, 166
 UNION, 46, 142, 143
 Universal Judgment, 45, 58
 Universal validity, problem of, in predicate calculus, 112, 128
 — — in sentential calculus, 21
 VALID formulas, 68, 129
 Variables, bound and free, 59
 — individual, 65, 168
 — predicate, 65, 165
 — sentential, 65, 168
 WELL-ordering, 143
