

TABLE OF CONTENTS

Editor's Preface	iii
Preface to the First Edition.....	vii
Preface to the Second Edition.....	ix

I. THE SENTENTIAL CALCULUS

§ 1. Introduction of the Fundamental Logical Connectives	3
§ 2. Equivalence; Dispensability of Fundamental Connectives	5
§ 3. Normal Form for Logical Expressions.....	11
§ 4. Characterization of Logically True Combinations of Sentences	13
§ 5. The Principle of Duality.....	15
§ 6. The Disjunctive Normal Form for Logical Expressions	17
§ 7. The Totality of Combinations which Can be Formed from Given Elementary Sentences.....	18
§ 8. Supplementary Remarks on the Problem of Universal Validity and Satisfiability.....	21
§ 9. Systematic Survey of All the Deductions from Given Axioms	23
§ 10. The Axioms of the Sentential Calculus.....	27
§ 11. Examples of the Proof of Theorems from the Axioms	30
§ 12. The Consistency of the System of Axioms.....	38
§ 13. The Independence and Completeness of the System...	40

II. THE CALCULUS OF CLASSES (MONADIC PREDICATE CALCULUS)

§ 1. Reinterpretation of the Symbolism of the Sentential Calculus	44
§ 2. The Combination of the Calculus of Classes with the Sentential Calculus	47
§ 3. Systematic Derivation of the Traditional Aristotelian Inferences	48

III. THE RESTRICTED PREDICATE CALCULUS

§ 1. Inadequacy of the Foregoing Calculus.....	55
§ 2. Methodological Basis of the Predicate Calculus.....	56
§ 3. Preliminary Orientation on the Use of the Predicate Calculus	61
§ 4. Precise Notation for the Predicate Calculus.....	65
§ 5. The Axioms of the Predicate Calculus.....	67
§ 6. The System of Universally Valid Formulas.....	71
§ 7. The Rule of Substitution; Construction of the Contra- dictory of a Formula.....	79
§ 8. The Extended Principle of Duality; Normal Forms... ..	81
§ 9. Consistency and Independence of the System of Axioms	87
§ 10. The Completeness of the Axiom System.....	92
§ 11. Derivation of Consequences from Given Premises; Relation to Universally Valid Formulas.....	101
§ 12. The Decision Problem.....	112

IV. THE EXTENDED PREDICATE CALCULUS

§ 1. The Predicate Calculus of Second Order.....	125
§ 2. Introduction of Predicates of Second Level; Logical Treatment of the Concept of Number.....	135
§ 3. Representation of the Fundamental Concepts of Set Theory in the Extended Calculus.....	139
§ 4. The Logical Paradoxes.....	143
§ 5. The Predicate Calculus of Order ω	152
§ 6. Applications of the Calculus of Order ω	158
