

Contents

Preface	ix
Chapter 1. Harmonic Functions	1
1.1. Guide	1
1.2. Mean Value Properties	1
1.3. Fundamental Solutions	8
1.4. Maximum Principles	15
1.5. Energy Method	19
Chapter 2. Maximum Principles	25
2.1. Guide	25
2.2. Strong Maximum Principle	25
2.3. A Priori Estimates	30
2.4. Gradient Estimates	33
2.5. Alexandroff Maximum Principle	37
2.6. Moving Plane Method	44
Chapter 3. Weak Solutions: Part I	47
3.1. Guide	47
3.2. Growth of Local Integrals	48
3.3. Hölder Continuity of Solutions	55
3.4. Hölder Continuity of Gradients	60
Chapter 4. Weak Solutions, Part II	67
4.1. Guide	67
4.2. Local Boundedness	67
4.3. Hölder Continuity	78
4.4. Moser's Harnack Inequality	83
4.5. Nonlinear Equations	93
Chapter 5. Viscosity Solutions	99
5.1. Guide	99
5.2. Alexandroff Maximum Principle	99
5.3. Harnack Inequality	104
5.4. Schauder Estimates	113
5.5. $W^{2,p}$ Estimates	118
5.6. Global Estimates	122

Chapter 6. Existence of Solutions	125
6.1. Perron Method	125
6.2. Variational Method	130
6.3. Continuity Method	134
6.4. Compactness Methods	136
6.5. Single- and Double-Layer Potentials Methods	139
6.6. Fixed-Point Theorems and Existence Results	142
Bibliography	147
