Preface	vii
Chapter 1. The Classical WKB Method	1
1.1. Introduction	1
1.2. WKB Approximation to the Linear Schrödinger Equation	2
1.3. The WKB Approximation to Nonlinear Schrödinger Equation	5
1.4. References and Remarks	10
Chapter 2. Wigner Measure	11
2.1. Semiclassical Pseudodifferential Operators and the FBI Transform	11
2.2. Wigner Measure	14
2.3. Semiclassical Limit of the Linear Schrödinger Equation	30
2.4. References and Remarks	34
Chapter 3. The Limit from the One-Dimensional Schrödinger-Poisson to Vlasov-Poisson Equations	37
3.1. Introduction	37
3.2. Uniform Estimates	42
3.3. The Limit to the Vlasov-Poisson Equations	46
3.4. The Main Theorem	73
3.5. Mixed State Case	76
3.6. References and Remarks	79
Chapter 4. Semiclassical Limit of Schrödinger-Poisson Equations	81
4.1. Introduction	81
4.2. Preliminaries	84
4.3. Modulated Energy Estimate	89
4.4. The Main Theorem	95
4.5. References and Remarks	104
Chapter 5. Semiclassical Limit of the Cubic Schrödinger Equation in an Exterior Domain	105
5.1. Introduction	105
5.2. Local Existence of a Smooth Solution to (5.7)–(5.8)	109
5.3. Uniform and Modulated Energy Estimates	115
5.4. Semiclassical Limit of the Cubic Schrödinger Equation	125
5.5. References and Remarks	127

Chapter 6. Incompressible and Compressible Limits of Coupled Systems of Nonlinear Schrödinger Equations	129
6.1. Introduction	129
6.2. Conservation Laws	131
6.3. Incompressible Limit of (6.1)	136
6.4. Compressible Limit of (6.2)	146
6.5. References and Remarks	152
Chapter 7. High-Frequency Limit of the Helmholtz Equation	153
7.1. Introduction	153
7.2. Uniform Estimate for Solutions of (7.1)	154
7.3. Limit to the Liouville Equation	159
7.4. References and Remarks	171
Appendix A. Global Solutions to (3.14)	173
Appendix B. Denseness of Polynomials	177
Appendix C. Global Existence of a Solution to (5.1)	179
Appendix D. Global Smooth Solution to (6.1)	189
Bibliography	193
