

Contents

Preface	vii
Chapter 1. Introduction	1
1.1. Modeling Biological Development	1
1.2. Early Stages: A Brief Survey	2
1.3. An Example: Formation of the Blastocoel	3
Chapter 2. Catastrophe Theory	13
2.1. Basic Elements	13
2.2. Categorization and Applications	19
2.3. Global Implications of Local Structure	27
Chapter 3. Pattern Formation	35
3.1. Biological Pattern	35
3.2. Reaction-Diffusion Systems: Inception of Inhomogeneity	38
3.3. Inhomogeneous Steady State	47
3.4. Multistable Regimes	53
3.5. Some Applications	61
Chapter 4. Differential Adhesion and Morphogenesis	67
4.1. Cell Sorting by Differential Adhesion	68
4.2. Rheology of Cell Aggregates	74
4.3. Elements of Morphodynamics	81
Chapter 5. The Origins of Movement	89
5.1. Chemistry and Geometry of Adhesion	89
5.2. Equilibrium and Stability	98
5.3. Gastrulation in Amphibians	101
5.4. Cell Motion in Thin Layers	110
5.5. Dynamics of Adhesion-Driven Structure	117
5.6. Cell-Substrate Adhesion	121
5.7. Imaginal Disc Evagination	123
Chapter 6. Chemotaxis	125
6.1. Initiation of Slime Mold Aggregation	125
6.2. Other Aspects of Chemotaxis	129
Chapter 7. Cell Proliferation	137
7.1. Homogeneous Population	137

7.2. Environmental Control of Cell Division	151
7.3. Stem Cell Dynamics	160
7.4. Sol-Gel Transformation	163
7.5. Mesoscopic Viewpoint	165
7.6. Turing Dynamical Resolution	169
Chapter 8. Somite Formation in Vertebrates	173
8.1. Elementary Oscillations	173
8.2. Time-Delay Oscillators	176
8.3. Biochemical Entrainment and Biochemical Waves	179
8.4. Clock, Wavefront, and Somite Condensation	185
Chapter 9. Compartments	191
9.1. The Evidence and Its Implications	191
9.2. Nonlinear Theory of Compartmentalization	198
Chapter 10. Segmentation of Insect Embryos	209
10.1. Prototypical Reaction-Diffusion: One Component	209
10.2. Prepattern Activation	215
10.3. Further Aspects of Reaction-Diffusion	221
10.4. Pattern Under Growth: Chick Limb Bud	225
10.5. Insect Imaginal Disc	227
Supplementary Notes	231
Chapter 2	231
Chapter 3	231
Chapters 4 and 5	233
Chapter 6	233
Chapters 7 and 8	234
Chapters 9 and 10	234
Bibliography	237
Index	245
