

## Index

- $\alpha$ -determinant, 27, 106
- $\alpha$ -permanent, 27, 106
- 3-Potts
  - Field Theory, 192
  - model, 8, 192
  - Unitary Kac Table, 192
- adjoint inversion map, 129
- Ashkin-Teller models, 9
- Blume-Capel model, 6, 190
- BPZ-equations, 183
- central charge
  - 3-Potts Field Theory, 193
  - Ising Field Theory, 188
  - of a CFT, 68
  - of a Virasoro algebra representation, 33
  - of the Free Boson Theory, 27
  - of two independent CFTs, 108
  - of unitary CFTs, 163
  - tricritical 3-Potts Field Theory, 194
  - tricritical Ising Field Theory, 191
- Clock Potts model, 9
- complex conjugation, 57
- conformal family, 136
- Conformal Field Theory, 14, 31, 68
  - on  $\hat{\mathbb{C}}$ , 101
  - Statistical Field Theory, 85
  - unitary, 113, 134
- conformal symmetry, 31, 38, 78
- conjugation map, 56
- correlation functions, 24, 45, 139
- descendant fields, 136
  - correlations, 139
  - null, 24, 137, 163, 182
- Dirichlet action, 19
- discrete Laplacian, 15
- energy density, 5, 7
- fields
  - bosonic, 26, 47
  - compatible, 46
  - conformally covariant, 95
  - continuous, 25
  - continuous local, 47
  - descendants, 136
  - Hermitian/reflection-conjugate, 58
  - holomorphic, 62
  - lattice local, 42
  - Möbius covariant, 95
  - null, 24, 137, 163, 182
  - null lattice local, 44
  - primary, 89
  - quasi-primary, 89
  - scaling dimensions, 45, 55
  - scaling lattice local, 21, 45
  - spin of, 54
  - transformation law for primary, 98
  - transformation law for quasi-primary, 98
- first intersection points, 173
- FK model, 189, 193
- FQS/Non-Unitarity Theorem, 166
- Free Boson Theory, 19, 49
  - central charge, 27
  - current, 63
  - holomorphic Stress Tensor, 26
  - null field, 24, 26
  - polynomial, 25
  - Stress-Energy Tensor, 74
  - Sugawara construction, 93

- Gaussian Free Field, 14
  - $n$ -point correlation functions of the, 18
  - conformal invariance of the, 18
  - continuous, 17
  - correlations of the discrete, 15
  - discrete, 14
  - discretization of local fields for the, 21
- GKO theorem, 166
- Green's function, 16
  
- Heisenberg picture, 118
- highest-weight vector, 144
  
- in-states, 128
  - pairing, 129
- inverse temperature, 3
  - critical, 4
- inversion map
  - at the lattice level, 126
  - on the plane, 124
- inversion-positivity property, 113, 128
- Ising
  - energy field, 28, 50, 188
  - Field Theory, 50, 188
  - model, 3
  - scaling limit, 28
  - spin correlations, 186
  - spin field, 28, 50, 188
  - transfer matrix, 116, 118
  - Unitary Kac Table, 188
  - Virasoro structure, 187
  
- Kac determinant, 151
  - formula, 156
- Kac Tables
  - $m = 3$  Unitary, 188
  - $m = 4$  Unitary, 190
  - $m = 5$  Unitary, 192
  - infinite, 154
  - Unitary, 159
  
- lattice radial quantization scheme, 127
  
- Möbius maps, 101
- magnetization, 5, 7
  
- Operator Product Expansion, 65
  - holomorphic, 63
  - operator-state correspondence, 118, 128
  
- percolation, 9
- phase transition, 4
  - discontinuous, 6, 9
  - second-order, 4
  - universality, 9
  
- Q-Potts model, 8
  
- radial lattice, 120
- reflection-positivity property, 113, 120
- relation
  - CLE( $\kappa$ )/central charge  $c$ , 189, 194
  - FK( $q$ )/CLE( $\kappa$ ), 195
  - gasket dimension CLE( $\kappa$ )/ $\kappa$  parameter, 194
- Renormalization Group, 11
- RSOS models, 9
- RST-diffeomorphisms near insertion points, 61
  
- Satellite Integral Identity, 89
- scaling dimensions, 45, 52
  - 3-Potts Field Theory, 193
  - Ising Field Theory, 188
  - left-, right-, 55
  - tricritical 3-Potts Field Theory, 194
  - tricritical Ising Field Theory, 190
  - Unitary Minimal Models, 182
- Schrödinger picture, 117
- Schwarzian derivative, 99
- Shapovalov form, 113, 147
  - Gram matrix, 148
  - kernel of the, 149
  - positive (semi)-definiteness of the, 159
- Shapovalov property, 113
  - for Fourier modes, 133
  - for Stress Tensor modes, 134
- SLE, CLE
  - 3-Potts model, 193
  - FK models, 195
  - Ising model, 188
  - tricritical 3-Potts model, 194

- tricritical Ising model, 191
- Statistical Field Theory, 47
  - Asymptotic Universality
    - Equivalence (AUE), 59
  - closed under holomorphic OPEs, 64
  - extended ILADE property, 94
  - Infinitesimal Local Asymptotic
    - Conformal Invariance (ILACI), 79
  - Infinitesimal Local Asymptotic
    - Diffeomorphism Equivalence (ILADE), 75
  - inversion-positivity property, 127, 128
  - Local Asymptotic Conformal
    - Invariance (LACI), 78
  - Local Asymptotic Diffeomorphism
    - Equivalence (LADE), 61
  - on the cylinder, 121
  - radial implementation property, 122
  - reflection invariance property, 56
  - regular, 48
  - rotational equivalence property, 54
  - RST-local implementation property, 61
  - spin-diagonalizable, 54
  - stable under complex conjugation, 57
  - translation invariance property, 52
- Stress Tensor
  - $n$ -point correlation functions, 26, 106
  - Free Boson Theory, 26
  - geometric interpretation of the, 75
