

Contents

Introduction	ix
1 To the Student	ix
2 To the Professor	x
1 Identification Numbers and Check Digit Schemes	1
1.1 Developing Identification Numbers	1
1.2 Types of Identification Numbers	2
1.3 Transmission Errors	4
1.4 Check Digits	5
2 Number Theory, Check Digit Schemes, and Cryptography	9
2.1 Preliminaries	9
2.2 Integer Division	10
2.3 Modulo Arithmetic	19
2.4 US Postal Money Orders	26
2.5 Airline Ticket Identification Numbers	30
2.6 The Universal Product Code Check Digit Scheme	34
2.7 The ISBN Check Digit Scheme	41
2.8 Cryptography and the RSA Public-Key System	45
3 Functions, Permutations, and Their Applications	61
3.1 Sets	61
3.2 Creating Identification Numbers	66
3.3 Functions	72
3.4 Permutations	81

3.5	The IBM Scheme	92
3.6	Graphs of Functions	98
4	Symmetry and Rigid Motions	105
4.1	Symmetry	105
4.2	Symmetry and Rigid Motions	112
5	Group Theory and the Verhoeff Check Digit Scheme	121
5.1	Fundamental Concepts	121
5.2	Cayley Tables	137
5.3	Powers and Orders of Group Elements	144
5.4	The Verhoeff Check Digit Scheme	152
6	Bibliography	167
	Index	173
