Newsletters and Commentaries

1. Arctangents	1
2. Benford's Law	11
3. Braids	19
4. CLIP Theory	25
5. Dots and Dashes	31
6. Factor Trees	37
7. Folding Fractions and Conics	43
8. Folding Patterns and Dragons	53
9. Folding and Pouring	63
10. Fractions	69
11. Integer Triangles	77
12. Lattice Polygons	87
13. Layered Tilings	95
14. The Middle of a Triangle	103
15. Partitions	111
16. Personalized Polynomials	123
17. Playing with Pi	129
18. Pythagoras's Theorem	137
19. On Reflection	145
20. Repunits and Primes	157
21. The Stern-Brocot Tree	163
22. Tessellations	171
23. Theon's Ladder and Squangular Numbers	183
24. Tilings and Theorems	193

25. The Tower of Hanoi	205
26. Weird Multiplication	211

Appendices

I: Numbers that are the Sum of Two Squares	221
II: Pick's Theorem	231
III: The Möbius Function	237
IV: The Borsuk-Ulam Theorem	241
V: The Galilean Ratios	245
VI: A Candy-Sharing Game	249
VII: Bending Buffon's Needle	257
VIII: On Separating Dots	263

Indexes

Index of Topics	269
