

# Contents

<b>Preface</b>	ix
<b>How to Use this Book</b>	xi
<b>1 Tic-Tac-Whoa!</b>	1
<i>Axel Brandt</i>	
1.1 Background	1
1.2 Implementation	2
1.3 Conclusion	6
References	6
<b>2 Using Micro Robots to Develop Mathematical Thinking</b>	7
<i>Adam Glesser and Matt Rathbun</i>	
2.1 Background	7
2.2 Game description	8
2.3 Implementation	10
2.4 Conclusion	13
References	14
<b>3 Game Changers: Building Quantitative Literacy by Simulating Structural Inequality</b>	15
<i>Vivian Y. Lim</i>	
3.1 Background	16
3.2 Game description and implementation	17
3.3 Conclusion	22
References	23
<b>4 Teaching Probability Using Dice and Risk®</b>	25
<i>Amanda Harsy, Karen Holmes, Scott Kaschner, and Marie Meyer</i>	
4.1 Background	26
4.2 Game description	26
4.3 Implementation	27
4.4 Conclusion	30
References	31

<b>5</b>	<b>Counting Your Winnings at the Casino</b>	33
	<i>Amanda Harsy, Karen Holmes, Scott Kaschner, and Marie Meyer</i>	
5.1	Background	34
5.2	Game description: Roulette	34
5.3	Game description: Keno	38
5.4	Conclusion	41
	Appendix	42
	References	44
<b>6</b>	<b>Probability Problems from the Arkham Horror Card Game</b>	45
	<i>Aaron Montgomery</i>	
6.1	Introduction	45
6.2	Background	45
6.3	Game description and implementation	46
6.4	Conclusion	55
	References	55
<b>7</b>	<b>Risk It All or Play It Safe? Exploring Probability Through Farkle</b>	57
	<i>Jeremiah Bartz</i>	
7.1	Background	57
7.2	Game description and implementation	58
7.3	Conclusion	62
	References	62
<b>8</b>	<b>Function Battleship</b>	63
	<i>Jacob Heidenreich</i>	
8.1	Background	63
8.2	Game description and implementation	64
8.3	Conclusion	67
	References	68
<b>9</b>	<b>Numeration Systems Sudoku</b>	69
	<i>Christine Latulippe</i>	
9.1	Background	69
9.2	Game description	70
9.3	Implementation	72
9.4	Conclusion	73
	Appendices	74
	References	79
<b>10</b>	<b>Set Theory Games with Apples to Apples Cards</b>	81
	<i>Michael Martinez</i>	
10.1	Introduction	81
10.2	Implementation	82
10.3	Game descriptions	83
10.4	Further options	85
	References	86

<b>11 Learning Graph Theory by Designing Games</b>	87
<i>Feryal Alayont and David Clark</i>	
11.1 Background	87
11.2 Game design project	88
11.3 Game examples	91
11.4 Tips for beginners	93
11.5 Conclusion	94
References	95
<b>12 From Puzzles to Proof-writing: Exploring Rich Mathematical Ideas Through Mechanical Puzzles</b>	97
<i>Tara Davis, Lauren Grimley, Kenan İnce, Gizem Karaali, Boyan Kostadinov, and Roberto Soto</i>	
12.1 Background	98
12.2 Game description: Peg solitaire	99
12.3 Game description: Lights out	102
12.4 Conclusion	110
12.5 Acknowledgments	111
References	111
<b>13 Mathematical Communication Games: Telestrations in the Mathematics Classroom</b>	113
<i>Kayla Blyman and Marie Meyer</i>	
13.1 Background	114
13.2 Game description	115
13.3 Implementation	120
13.4 Additional considerations	122
13.5 Conclusion	123
<b>14 Game, SET, Algebra!</b>	125
<i>Timothy Goldberg</i>	
14.1 Background	126
14.2 Game description	126
14.3 Implementation	127
14.4 Conclusion	134
References	134
<b>15 Off to a Good Start: Using Mathematics to Evaluate Settlement Locations in <i>Catan</i></b>	137
<i>Jathan Austin, Brian G. Kronenthal, and Susanna Molitoris Miller</i>	
15.1 Background	137
15.2 Game description	138
15.3 Implementation	139
15.4 Conclusion	143
References	143

<b>16 Bandits on a Wall</b>	145
<i>Michael P. Allocca and Jennifer Franko Vasquez</i>	
16.1 Background	145
16.2 Game description and implementation	146
16.3 Conclusion	150
References	151
<b>17 Get in the 'Sonne: Using Carcassonne to Explore Mathematics</b>	153
<i>Mindy Capaldi and Timothy DeRolf</i>	
17.1 Background	153
17.2 Game description	154
17.3 Implementation	154
17.4 Conclusion	158
Acknowledgments	159
References	159
