Preface	xiii
How to Use this Book	xv
1 Investigating foundations of ancient Rapa Nui houses	1
Ximena Catepillán, Cynthia Huffman	
1.1 Introduction	1
1.2 Prerequisites & Project Preparation	2
1.3 Course Activity	2
1.4 Extensions & Alterations	7
1.5 Reflections & Advice	8
1.6 Additional Resources	8
References	9
2 Kinship and Group Theory	11
Thomas Gilsdorf	
2.1 Introduction	11
2.2 Prerequisites & Project Preparation	12
2.3 Course Activity	13
2.4 Extensions & Alterations	22
References	23
3 Visualizing Induction with African Sona Designs	25
Darrah P. Chavey	
3.1 Introduction	25
3.2 Background & Project Preparation	26
3.3 Course Activities	32
3.4 Extensions & Alterations	47
3.5 Reflections & Advice	47
3.6 Additional Resources	48
References	48
4 Japanese Temple Geometry	51
Elizabeth A. Donovan, Lucas A. Hoots, Lesley W. Wiglesworth	
4.1 Introduction	51
4.2 Prerequisites and Project Preparation	52
4.3 Course Activity	53

4.4	Extensions and Alterations	56
4.5	Reflections and Advice	57
	References	58
4.A	Project Guidelines	58
5	Abstract Algebra in Dance Composition	61
	Ashley W. White	
5.1	Introduction	61
5.2	Prerequisites & Project Preparation	62
5.3	Course Activity	62
5.4	Extensions & Alterations	69
5.5	Reflections & Advice	70
	References	70
6	Topological Dance Activities	71
	Karl H. Schaffer	
6.1	Introduction	71
6.2	Prerequisites & Project Preparation	72
6.3	Notes on Activities	74
6.4	Extensions & Alterations	78
6.5	Reflections & Advice	80
	References	81
6.A	Topological Dance Activities	82
6.B	Knot and Link Examples	91
6.C	Dance and Movement Checklist	92
7	Literary Incarnations of Topology	93
	Shanna N. Dobson	
7.1	Introduction	93
7.2	Prerequisites & Project Preparation	94
7.3	Course Project	95
7.4	Extensions & Alterations	97
7.5	Reflections & Advice	99
7.6	Additional Resources	99
	References	100
7.A	Rubric	100
8	Solving with Sherlock	103
	Amanda M. Harsy, Christopher W. Wielgos	
8.1	Introduction	103
8.2	Prerequisites & Project Preparation	104
8.3	Course Projects	105
8.4	Extensions & Alterations	112
8.5	Reflections & Advice	114
	References	114
8.A	Sample Discussion and Study Guide Questions	115
8.B	Questions for Analyzing Setting in a Film	115

Contents	ix
8.C Questions for Analyzing Characters in a Film	116
9 Mathematical Dramaturgy: Making Connections Between Mathematics and Literature	117
Linda McGuire, Tara Werner	
9.1 Introduction	117
9.2 Prerequisites & Project Preparation	119
9.3 Course Project	120
9.4 Extensions & Alterations	128
9.5 Reflections & Advice	131
References	131
9.A Prompts for a Peer Editing Session	132
9.B Project Rubric	132
10 Assessing the Bikeability of Bicycle Infrastructure with Graph Theory	135
Jacob P. Duncan	
10.1 Introduction	135
10.2 Prerequisites & Project Preparation	136
10.3 Course Project	136
10.4 Extensions & Alterations	140
10.5 Reflections	141
References	142
10.A Student Worksheet	142
11 Ramping Up Campus Accessibility Through Calculus	151
Melanie Pivarski	
11.1 Introduction	151
11.2 Prerequisites & Project Preparation	152
11.3 Course Project	152
11.4 Extensions & Alterations	159
11.5 Reflections & Advice	160
References	161
12 Who's Got the Power? Measuring Power in the US Legislative System	163
Victoria Powers	
12.1 Introduction	163
12.2 Prerequisites & Project Preparation	164
12.3 Course Project	164
12.4 Extensions & Alterations	167
12.5 Reflections & Advice	168
References	168
13 Order in the Court! Spectral Theory for an Introductory Linear Algebra Course	169
Martin W. Montgomery, Katharine A. Ott	
13.1 Introduction	169

13.2 Prerequisites & Project Preparation	170
13.3 Course Project	170
13.4 Extensions & Alterations	181
13.5 Reflections & Advice	181
References	182
14 Double Integrals and the Human Condition	183
Garner Cochran, Douglas T. Pfeffer, Ron Taylor	
14.1 Introduction	183
14.2 Prerequisites & Project Preparation	184
14.3 Course Activity	185
14.4 Extensions & Alterations	189
14.5 Reflections & Advice	190
References	191
15 Making Mathematics Relevant: Math in the News	193
Alice E. Petillo	
15.1 Introduction	193
15.2 Prerequisites & Project Preparation	194
15.3 Course Activity	194
15.4 Extensions & Alterations	196
15.5 Reflections & Advice	196
15.A Sample Article and Summary/Response	197
15.B For Instructor Use: Illustrative Student Submissions and Peer Comments	197
15.C Sample 20-Point Rubric	199
16 Graph Theoretical Modeling of Tile-Based DNA Self-Assembly	201
Leyda M. Almodóvar, Amanda M. Harsy, Cory M. Johnson, Jessica L. Sorrells	
16.1 Introduction	201
16.2 Prerequisites & Project Preparation	202
16.3 Course Activity	203
16.4 Extensions & Alterations	215
16.5 Reflections & Advice	216
References	216
17 Estimating the Size and Shape of a Lung Nodule from an X-ray Image	219
Nadia S. Kennedy, Boyan S. Kostadinov, Ariane M. Masuda	
17.1 Introduction	219
17.2 Prerequisites and Project Preparation	220
17.3 Course Project	220
17.4 Extensions and Research Projects	223
17.5 Reflections and Advice	225
Acknowledgments	225
References	226
17.A Course Project: Student Handouts	226

Contents	xi
18 Gradient Descent Methods in Machine Learning	233
Christina J. Edholm, Maryann E. Hohn, Ami E. Radunskaya	
18.1 Introduction	233
18.2 Prerequisites & Project Preparation	234
18.3 Course Activity	234
18.4 Extensions & Alterations	247
18.5 Reflections & Advice	249
References	249
19 Application-Inspired Real Analysis: Image Denoising	251
Marie A. Snipes, Heather A. Moon, Thomas J. Asaki	
19.1 Introduction	251
19.2 Prerequisites & Project Preparation	252
19.3 Course Labs	252
19.4 Alterations and Extensions	267
19.5 Reflections & Advice	268
19.6 Additional Resources	268
References	269
20 The Seahorse Reveals the Waves	271
Lynne Seymour, Adam Jaeger, R. Brian Merritt	
20.1 Introduction	271
20.2 Prerequisites & Project Preparation	272
20.3 Course Project	274
20.4 Extensions & Alterations	281
20.5 Reflections & Advice	282
20.6 Additional Resources	283
References	283
21 A Topology Scavenger Hunt to Introduce Topological Data Analysis	285
Lori Ziegelmeier	
21.1 Introduction	285
21.2 Prerequisites & Project Preparation	286
21.3 Course Project	287
21.4 Extensions & Alterations	289
21.5 Reflections & Advice	292
Acknowledgment	293
References	293
21.A Reading Questions	295
22 Adventures in the SET[®] Card Game	297
Anne Quinn	
22.1 Introduction	297
22.2 Prerequisites & Project Preparation	297
22.3 Course Project	299
22.4 Extensions & Alterations	302
22.5 Reflections & Advice	306

Copyright permission	307
References	307
23 Quads: A SET-Like Game with a Twist	309
Lauren L. Rose	
23.1 Introduction	309
23.2 Prerequisites & Project Preparation	310
23.3 Course Project	310
23.4 Extensions & Alterations	318
23.5 Reflections & Advice	319
Credits	320
References	320
24 Eminently Logical: The Monty Hall Paradox as a Teaching Tool	321
Christopher M. Ingrassia	
24.1 Introduction	321
24.2 Prerequisites & Project Preparation	322
24.3 Course Activity	322
24.4 Extensions & Alterations	326
24.5 Reflections & Advice	327
References	327
25 Enumeration of the Positive Rational Numbers Using the Calkin-Wilf Tree with Application to the Game Euclid	329
Stanley R. Huddy, Brittany C. Ohlinger	
25.1 Introduction	329
25.2 Prerequisites & Project Preparation	330
25.3 Course Project	330
25.4 Extensions & Alterations	336
25.5 Reflections & Advice	338
References	338
26 Get in the Game with Linear Algebra	339
Amanda M. Harsy, Michael D. Smith	
26.1 Introduction	339
26.2 Prerequisites & Project Preparation	340
26.3 Course Activity	341
26.4 Extensions & Alterations	346
26.5 Reflections & Advice	346
References	347
26.A Lab Exercises	348
Index of Math Courses	351
Index of Interdisciplinary Connections	351
