Index

action, of a compact group
  on a κ-solution, 252–254
  on the standard solution, 254
Alexandrov ball, 7, 125, 126, 163
Alexandrov space, 7–9, 73–74, 101, 107, 110, 116–139
  of curvature ≥ -1, 103
  of curvature $\geq k$, 108, **116**
  of dimension 2, 141–162
angle between geodesics
  in an Alexandrov space, 117
annular region, good, **149**
asymptotic volume, 70

ball, centered at boundary point, 173–175
boundary
  of an Alexandrov space, 129
boundary, incompressible, 95–97, 99, 106, 273

(C, ϵ)-cap, **19**
canonical neighborhood, **19**, 19–20, 22, 42, 52, 56–65
  linear action of a compact group, 251
canonical neighborhood function, 18, 22, 66
cap, of the standard solution, 14
cap, surgery, 14, 15, 22, 43, 50, 53, 55, 57, 58, 83
chain
  calibrated collection, **224**
    complete, **229**
  total space of, **223**
chain, of ϵ-solid cylinders, 221
  circular, **222**
  linear, **222**
collar, good, 153
comparison angle, 73, 107, 114
component
  close to a 2-dimensional Alexandrov space, **213**
  near a 1-dimensional end point, **214**
cone angle, 7, 109, 141, **142**
core, of a ξ-box, **157**
core, of a solid cylinder, **184**, 217
curvature pinching, **19**, 21, 65
cusp, 3, **31**, 32, 35–37, 39, 272

Dehn's lemma, 248
directional derivative, of a function on an Alexandrov space, 131

elements, of a chain, **223**
  extremal, **223**
ends, of a ξ-box, 156
ϵ-neck, strong, 14, **19**
ϵ-tube, **264**
ϵ-approximation, 113
ϵ-cap, strong, 256
ϵ-cap, twisted, 256
ϵ-cap, strong
  group action on, 259–261
ϵ-cap, twisted
  group action on, 259–261
ϵ-net, 112
ϵ-solid torus, **202**
ϵ-solid cylinder, **202**, 216, 217, 219
  bisected by S_i, **219**
ϵ-solid torus, 217
  core of, 216
Euclidean volume estimate, 74

flat manifold, *see also* manifold, flat
free ends, of a chain, **223**
frontier point
  one-sided, 206, **206**
  two-sided, **206**

geodesic
  in an Alexandrov space, 116

geometric limit, 35
  at infinity, 35
geometric manifold, *see also* manifold, geometric
Geometrization Conjecture, **1**, 2–4, 95, 96, 99, 242
  equivariant version, 8, 245–280
  relative version, 6
  uniqueness of decomposition, 4
graph manifold, *see also* manifold, graph
Gromov-Hausdorff convergence, 101, 107, 111

H-connected sum, 246
Harnack inequality, 64
Hausdorff dimension, 108
Hausdorff distance, 111
horosphere, 30
horospherical torus, 3, 5, 32, 272, 279, 280
hyperbolic manifold, *see also* manifold, hyperbolic
hyperbolic tower, *see also* tower, hyperbolic

incompressible torus, *see also* torus, incompressible
interval product structure, 198, 207, 213

κ-non-collapsed manifold, *see also* manifold, κ-non-collapsed
κ-solution, 60, 70, 85

$\mathcal{L}$-length, 21, 43
  reduced, 44
length function, reduced, 44
length, of a ξ-box, 156
limit, geometric, **33**
  at infinity, **32**
    of a tower, **35**
  hyperbolic
    at infinity, 35
  of parabolic neighborhoods, 21
limit, hyperbolic
  at infinity, 32–39
linear action, of a compact group, 245
  on a ball, 250
  on the 3-sphere, 250
locally homogeneous manifold, *see also* manifold, locally homogeneous
locally volume collapsed
  on the negative curvature scale, 8
locally volume collapsed manifold, *see also* manifold, locally volume collapsed
loop theorem, 248

manifold, κ-non-collapsed, 16, *see also* region, volume non-collapsed
manifold, almost hyperbolic
  truncated, 34, **34**
manifold, essentially 1-dimensional, 3
manifold, essentially 2-dimensional, 3
manifold, essentially 3-dimensional, 3
manifold, geometric, 1, **1**, 3, 5
manifold, graph, 95, **96**, 98, 99, 104
manifold, homogeneous, **1**
manifold, hyperbolic, 1, 8, **30**
  of finite volume, 2, 3, 5, 30–39
    truncation of, 7, **31**
manifold, hyperbolic, of finite volume
  truncation of, 31
manifold, locally homogeneous, 1, *see also* manifold, geometric
manifold, locally volume collapsed, 6–8
  on the negative curvature scale, 6, 7
manifold, modelled on
  $S^2 \times \mathbb{R}$, 2
  hyperbolic 2-space times $\mathbb{R}$, 2
  Nil, 2
  Solv, 2
  the universal cover of $PSL_2(\mathbb{R})$, 2
manifold, round, 2
manifold, Seifert fibered, 3
manifold, semi-positive, 3
manifolds, converge geometrically, 32, *see also* limit, geometric
Margulis's Theorem, 31
metric
  locally homogeneous, 1, 4–6, 16, 96, 99
  normalized, 15
  used to define the ξ-box, 186
Mostow rigidity, 31
μ-approximation, 157

neck, equivariant, 263
non-collapsing function, 18

orientation character, of an action, 246

parabolic neighborhood
  backward, **18**
parabolic neighborhood, full
  backward, **18**, 21, 22, 42, 67, 72, 77
  forward, 18, 29, 51, 67, 86, 89

radius
  rescaled, **205**
  unrescaled, **205**
realization, of Gromov-Hausdorff convergence, 111
region, volume collapsed, 32
region, volume non-collapsed, 25, 29
regular function, on an Alexandrov space, 132
rescaling, of an Alexandrov space, 119
Ricci flow, **13**
  κ-non-collapsed, 42
  generalized, 17
  with surgery, 14, 41
    equivariant, 261
rough curvature, 116
rough dimension, 115, 125
rough volume, 115
round manifold, *see also* manifold, round

S^1-fibration, 166
  global, 168–173
S^1-product neighborhood, 163
  center of, 165
  horizontal spaces of, 165
  with ϵ-control, **165**, 166, 170
    reduced, 170–173
Seifert fibered, 95, 99
seifert fibered manifold, *see also* manifold, Seifert fibered
Seifert fibration, 95–106, 109, 180, 217–218, 231–234, 240–242, 273, 275, 278
semi-positive manifod, *see also* manifold, semi-possitive
side, of a ξ-box, 156
singularity, finite time, 13
Smith Conjecture, generalized, 270–271
solid cylinder neighborhood, **184**
soul, of a manifold of non-negative curvature, 177, 178, 192, 199, 253, 254, 261
space-form, spherical, 101
spanning disk, 217
spanning disk, in a solid cylinder neighborhood, 186
standard solution, 14
strainer, 73, 124, 165
  in a tangent sphere, **165**, 166
  size of, **73**
surface, incompressible, 9, 10
surgery cap, *see also* cap, surgery
surgery control parameter, 15, 66
surgery scale function, 14

tangent cone, of an Alexandrov space, 128
tangent sphere, of an Alexandrov space, 127
3-ball near a 2-dimensional corner, **202**
3-ball near 2-dimensional corner, 216
3-ball near 2-dimensional corner, 218–219
3-ball, near a 2-dimensional corner, **194**
tip, of cap
  in standard solution, 14
tip, of surgery cap, 15, 51, 52
torus, horospherical, **30**, 31
torus, incompressible, 1, 3, 4, 6, 8, 9, 39, 96–99, 246
tower, almost hyperbolic
  truncated, 34, **34**, 35, 37, 38

vector field, adapted to a ξ-box, 185, 188
volume non-collapsed, *see also* region, volume non-collapsed
volume non-collapsed manifold, *see also* manifold, volume non-collapsed
volume, reduced, 21, 44

width, of a ξ-box, 156

X_1-pair, **205**
ξ-box, **157**, 181
  core of, 181
  level circles of, **181**
