

Index of Terminology

- 2-category, 71
- C -acyclic, 51
- G -equivariant étale site, 196
- G -equivariant quasi-coherent sheaves on X , 207
- \mathcal{C} -morphism, 192
- j -invariant of elliptic curve, 265
- n -twisted sheaf, 251

- affine morphism (algebraic spaces), 155
- affine morphism of algebraic stacks, 212
- algebraic space, 122
- algebraic stack, 170
- Artin stack, 170
- Azumaya algebra, 251

- big quasi-coherent sheaf, 100
- big Zariski sheaf, 24
- Brauer-Severi scheme, 255

- canonical topology, 67
- cartesian morphism, 70
- cartesian sheaf, 194
- category fibered in groupoids, 78
- category fibered in sets, 76
- category over another category, 70
- center of sheaf of rings, 257
- chart for a morphism of stacks, 176
- classifying stack, 172
- closed imbedding (algebraic spaces), 130
- closed imbedding (algebraic stacks), 209
- closed morphism of algebraic spaces, 148
- closed morphism of algebraic stacks, 209
- closed subcategory, 120
- closed subspace, 157
- coarse moduli space, 221
- coequalizer, 288
- coherent sheaf on algebraic space, 152
- coherent sheaf on stack, 194
- continuous functor between sites, 44
- cosimplicial object in a category, 55
- coskeleton, 197
- coskeleton of a morphism, 59
- Deligne-Mumford stack, 178

- descent data, 93
- differential forms with log poles, 268
- discriminant of an elliptic curve, 262

- effective descent data, 94
- effective descent morphism, 94
- elliptic curve (over a scheme), 259
- epimorphism, 287
- equalizer, 287
- equivalence of fibered categories, 72
- essential image, 286
- étale, 13
- étale equivalence relation, 124
- étale neighborhood, 22
- étale site of an algebraic space, 151

- faithfully flat module, 7
- faithfully flat morphism of schemes, 9
- fiber product, 288
- fibered category, 70
- final object, 289
- finite presentation for modules, 9
- finite type morphism of algebraic spaces, 134
- finitely presented algebra, 9
- finitely presented morphism, 10
- flasque, 51
- flat morphism of schemes, 9
- formally étale, 13
- formally smooth, 13
- formally unramified, 13
- fppf-quasi-coherent sheaf, 206

- generalized effective Cartier divisor, 215
- geometric point, 22
- gerbe, 246
- Grothendieck topology, 36
- groupoid, 78
- groupoid in category C , 79

- imbedding (algebraic spaces), 130
- imbedding (algebraic stacks), 209
- inertia stack, 175
- initial object, 289
- integral ring homomorphism, 137

- limit of a functor, 287
- lisse-étale site of a stack, 192
- local complete intersection, 282
- local on domain, 120
- localized topos, 65
- locally finitely presented quasi-coherent sheaf, 10
- locally of finite presentation, morphism of schemes, 10
- locally quasi-coherent sheaf on simplicial space, 202
- locally separated algebraic space, 132
- locally separated morphism of algebraic spaces, 132
- maximal reduced closed substack, 214
- maximal reduced subspace, 157
- monomorphism, 287
- morphism of algebraic spaces having property P , 132
- morphism of ringed topoi, 44
- noetherian algebraic space, 134
- open imbedding (algebraic spaces), 130
- open imbedding (algebraic stacks), 209
- point of a topos, 51
- point of algebraic space, 146
- points, topos has enough, 51
- presheaf on a category, 38
- prestable curve, 266
- prestable map, 278
- prestack, 112
- principal G -bundle, 109
- projective system of schemes, 11
- proper morphism of algebraic spaces, 148
- proper morphism of algebraic stacks, 210
- pullback of an object, 70
- quasi-affine morphism, 107
- quasi-coherent sheaf on algebraic space, 152
- quasi-coherent sheaf on stack, 194
- quasi-coherent simplicial sheaf, 201
- quasi-compact algebraic space, 134
- quasi-compact morphism of algebraic spaces, 134
- quasi-finite morphism of algebraic spaces, 158
- quasi-inverse, 290
- quasi-separated algebraic space, 132
- quasi-separated morphism of algebraic spaces, 132
- quasi-separated morphism of stacks, 178
- regular imbedding, 282
- relative space, 192
- representable by schemes, 121
- representable functor, 286
- representable morphism of stacks, 169
- ringed topos, 44
- root stack, 217
- scheme-theoretic image for morphism of algebraic spaces, 157
- separated algebraic space, 132
- separated morphism of algebraic spaces, 132
- separated morphism of algebraic stacks, 210
- separated morphism of stacks, 178
- separated presheaf, 38
- sheaf on site, 38
- sheafification, 40
- simplicial object in a category, 55
- site, 36
- small category, 285
- smooth, 13
- spectral sequence of covering, 64
- split fibered category, 77
- splitting of fibered category, 77
- stable class of objects, 120
- stable curve, 270
- stable map, 279
- stable subcategory/property, 120
- stack, 112
- stackification, 114
- stacky proj, 213
- Stein factorization, 158
- strict henselization, 22
- support of coherent sheaf, 158
- tame Deligne-Mumford stack, 231
- topoi, morphism of, 43
- topos, 40
- torsor on a site, 108
- torsor, sets, 14
- universal curve over \mathcal{M}_g , 213
- universally closed morphism of algebraic spaces, 148
- universally closed morphism of algebraic stacks, 209
- unramified, 13
- valuative criterion for properness, 235
- Yoneda imbedding, 23
- Yoneda's lemma, 287
