

Contents

Preface	vii
Cluster-tilting theory	
A. BAKKE BUAN AND R. MARSH	1
Introduction to moduli spaces associated to quivers	
CH. GEISS (WITH AN APPENDIX BY L. LE BRUYN AND M. REINEKE)	31
From triangulated categories to Lie algebras: A theorem of Peng and Xiao	
A. HUBERY	51
A-infinity algebras, modules and functor categories	
B. KELLER	67
Rouquier's theorem on representation dimension	
H. KRAUSE AND D. KUSSIN	95
Foundation of the representation theory of Artin algebras, using the Gabriel-Roiter measure	
C. M. RINGEL	105
Categorification of \mathfrak{sl}_2 and braid groups	
R. ROUQUIER	137
Selfinjective algebras: Finite and tame type	
A. SKOWROŃSKI	169
Support varieties for modules and complexes	
Ø. SOLBERG	239
