

## Contents

Preface	vii
The work of Stephen Vági ADAM KORÁNYI	1
On fractional calculus associated to doubling and non-doubling measures A. EDUARDO GATTO	15
Fluids and singular integrals CHARLES FEFFERMAN	39
The well-posedness of non-linear dispersive equations: Some recent developments CARLOS KENIG	53
The BMO extended family in product spaces CORA SADOSKY	63
Mean convergence of Cesàro means of Laguerre expansions BENJAMIN MUCKENHOPT	79
Variation inequalities for singular integrals and related operators ROGER L. JONES	89
A maximal function on the discrete Heisenberg group with applications to ergodic theory STEPHEN WAINGER	123
Problems	131
Index	145
