

Contents

Preface	vii
Program of the Fifth Prairie Analysis Seminar	ix
Improved Painlevé removability for bounded planar quasiregular mappings KARI ASTALA, ALBERT CLOP, JOAN MATEU, JOAN OROBITG, and IGNACIO URIARTE-TUERO	1
Time-frequency estimates for pseudodifferential operators ÁRPÁD BÉNYI and KASSO A. OKOUDJOU	13
Extrapolation of operators defined on domains and boundary respecting A_p weights RYAN BERNDT	23
Existence, uniqueness and regularity of the free boundary in the Hele-Shaw problem with a degenerate phase IVAN A. BLANK, MARIANNE K. KORTEN, and CHARLES N. MOORE	33
On blowup solutions of NLS with low regularity initial data J. COLLIANDER	43
Are L^2 -bounded homogeneous singular integrals necessarily L^p -bounded? LOUKAS GRAFAKOS, PETR HONZÍK, and DMITRY RYABOGIN	51
A note on Chebyshev polynomials and finite difference wave equation ANATOLII GRINSHPAN	57
Complex-valued solutions of the Benjamin-Ono equation ALEXANDRU D. IONESCU and CARLOS E. KENIG	61
The 2D quasi-geostrophic equations in the Sobolev space NING JU	75
Convex functions and quasiconformal mappings LEONID V. KOVALEV and DIEGO MALDONADO	93
Volterra integral inclusions: existence of solutions PRISCILLA SUPNET MACANSANTOS	105
Bellman function and the $H^1 - BMO$ duality LEONID SLAVIN and ALEXANDER VOLBERG	113

Weights and Hölder norms for solutions to a second order elliptic Dirichlet problem on nonsmooth domains CAROLINE SWEEZY	127
Hankel operators and VMO on the bi-disc ERIN TERWILLEGER	139
Necessary conditions for optimization problems governed by differential algebraic inclusions LIANWEN WANG	153
