Program of Conference	xi

A Short Biography and the Work of Professor Sunada

Brief Profile of Professor Toshikazu Sunada ATSUSHI KATSUDA and POLLY WEE SY	3
An Overview of Sunada's Work up to Age 60 ATSUSHI KATSUDA and POLLY WEE SY	7

Articles

Sunada's Isospectrality Technique: Two Decades Later CAROLYN GORDON	45
A Central Limit Theorem on Modified Graphs of Nilpotent Covering Graphs SATOSHI ISHIWATA	59
Hidden Symmetries and Spectrum of the Laplacian on an Indefinite Riemannian Manifold TOSHIYUKI KOBAYASHI	73
Spectra of Alternating Hilbert Operators NOBUSHIGE KUROKAWA and HIROYUKI OCHIAI	89
A Liouville Property and its Application to the Laplacian of an Infinite Graph JUN MASAMUNE	103
A Note on Zero-Free Regions for the Derivative of Selberg Zeta Functions MAKOTO MINAMIDE	117
Chern-Simons Variation and Deligne Cohomology MASANORI MORISHITA and YUJI TERASHIMA	127
Renormalized Rauzy-Veech-Zorich Inductions TAKEHIKO MORITA	135

Visualization of Standard Realized Crystal Lattices HISASHI NAITO	153
Value Distribution and Distribution of Rational Points JUNJIRO NOGUCHI	165
Limiting Distributions for Geodesics Excursions on the Modular Surface MARK POLLICOTT	177
On the Statistics of the Minimal Solution of a Linear Diophantine Equation and Uniform Distribution of the Real Part of Orbits in Hyperbolic Spaces MORTEN S. RISAGER and ZEÉV RUDNICK	187
Computations of Spectral Radii on \mathcal{G} -Spaces LAURENT SALOFF-COSTE and WOLFGANG WOESS	195
Lengths, Quasi-Morphisms and Statistics for Free Groups MATTHEW HORSHAM and RICHARD SHARP	219
Semiclassical Asymptotics on Manifolds with Boundary NILUFER KOLDAN, IGOR PROKHORENKOV, and MIKHAIL SHUBIN	239
On Geometric Analogues of the Birch and Swinnerton-Dyer Conjecture for Low Dimensional Hyperbolic Manifolds KEN-ICHI SUGIYAMA	267
Ray-Singer Zeta Functions for Compact Flat Manifolds TOSHIKAZU SUNADA and HAJIME URAKAWA	287
Bernstein Measures on Convex Polytopes TATSUYA TATE	295
Real and Complex Zeros of Riemannian Random Waves STEVE ZELDITCH	321
