

Contents

Preface	vii
Probability	
The Role of Weak Convergence in Probability Theory S. R. S. VARADHAN	3
Foundations of Quantum Mechanics	
Statistical models on a simplex ENRICO G. BELTRAMETTI	13
Quantum Error Correcting Codes	
Quantum Error Correcting Codes and Weyl Commutation Relations K. R. PARTHASARATHY	29
Finite and Infinite Dimensional Lie Groups and Algebras and their Representations	
Ideals in parabolic subalgebras of simple Lie algebras VYJAYANTHI CHARI, R. J. DOLBIN, and T. RIDENOUR	47
Quantizations of modules of differential operators CHARLES H. CONLEY	61
Geometric realization of PRV components and the Littlewood-Richardson cone IVAN DIMITROV and MIKE ROTH	83
Kaç algebras, quantum doubles and planar algebras S. JIJO and V. S. SUNDER	97
On a theorem of Ranee Brylinski BERTRAM KOSTANT and NOLAN WALLACH	105
Conjugacy of maximal toral subalgebras of direct limits of loop algebras HADI SALMASIAN	133

A multiplicity formula for tensor products of SL_2 modules and an explicit Sp_{2n} to $Sp_{2n-2} \times Sp_2$ branching formula NOLAN WALLACH and ODED YACOBI	151
--	-----

Super Lie Groups and Supergeometry

Super G -spaces LUIGI BALDUZZI, CLAUDIO CARMELI, and GIANNI CASSINELLI	159
Quotients in Supergeometry LUIGI BALDUZZI, CLAUDIO CARMELI, and RITA FIORESI	177
Special geometry of $D = 4, 5$ supersymmetry MARÍA ANTONIA LLEDÓ and JOSÉ ANTONIO LÓPEZ	189

Supersymmetry

Symmetric Spaces in Supergravity SERGIO FERRARA and ALESSIO MARRANI	203
Symmetry and Superstring Phenomenology MARY K. GAILLARD	229
Supersymmetry: A personal view B. ZUMINO	241
