

## Contents

Introduction	vii
Classifying foliations S. HURDER	1
Classifying spaces for groupoid structures T. TSUBOI	67
Compact foliations with Bott-Morse singularities B. SCÁRDUA and J. SEADE	83
Dynamiques Source-Puits et Flots transversalement affines G. HECTOR and M. A. CHAOUCH	99
Structurally stable singular actions of $\mathbb{R}^2$ having a first integral J. L. ARRAUT and C. MAQUERA	127
The parameter rigid flows on orientable 3-manifolds S. MATSUMOTO	135
The Euler class of planar groups D. CALEGARI	141
Global fixed points for groups of homeomorphisms of the circle Y. MATSUDA	151
Orthogonal total foliations: Godbillon-Vey forms via local conformal invariants P. G. WALCZAK	155
Prescribed mean curvature hypersurfaces in warped products F. J. ANDRADE, J. L. M. BARBOSA, and J. H. S. DE LIRA	161
On Thurston's inequality for spinnable foliations H. KODAMA, Y. MITSUMATSU, S. MIYOSHI, and A. MORI	173
Reeb components and Thurston's inequality S. MIYOSHI and A. MORI	195
Wrinkled embeddings Y. M. ELIASHBERG and N. N. MISHACHEV	207
