| Introduction  | vii |
| Conference Talks  | xi  |
| List of Participants  | xix |
| Dirac cohomology and unipotent representations of complex groups<br>D. BARBASCH and P. PANDŽIĆ                              | 1   |
| Algebraic index theorem for symplectic deformations of gerbes<br>P. BRESSLER, A. GOROKHOVSKY, R. NEST, and B. TSYGAN        | 23  |
| Index theory for basic Dirac operators on Riemannian foliations<br>J. BRÜNING, F.W. KAMBER, and K. RICHARDSON               | 39  |
| The Witt construction in characteristic one and quantization<br>A. CONNES   | 83  |
| Lie prealgebras<br>M. DUBOIS-VIOLETTE and G. LANDI  | 115 |
| On the analogy between complex semisimple groups<br>and their Cartan motion groups<br>N. HIGSON                             | 137 |
| A survey on Hopf-cyclic cohomology and Connes-Moscovici characteristic map<br>A. KAYGUN                                     | 171 |
| A super version of Connes-Moscovici Hopf algebra<br>M. KHALKHALI and A. POURKIA   | 181 |
| Analytic torsion of $\mathbb{Z}_2$ -graded elliptic complexes<br>V. MATHAI and S. WU  | 199 |
| The $K$ -groups and the index theory of certain comparison $C^*$ -algebras<br>B. MONTHUBERT and V. NISTOR                   | 213 |
| Relative pairings and the Atiyah-Patodi-Singer index formula for the<br>Godbillon-Vey cocycle<br>H. MORIYOSHI and P. PIAZZA | 225 |
| Two exact sequences for lattice cohomology<br>A. NÉMETHI  | 249 |
| Cup products in Hopf cyclic cohomology with coefficients in contramodules<br>B. RANGIPOUR                                   | 271 |

|  |     |
|--|-----|
| Algebras of $p$ -symbols, noncommutative $p$ -residue, and the Brauer group<br>M. WODZICKI | 283 |
| Large scale geometry and its applications<br>G. YU   | 305 |
