

Contents

Introduction	vii
List of participants	ix
Introduction to tropical algebraic geometry DIANE MACLAGAN	1
Tropical curves and integrable piecewise linear maps REI INOUE and SHINSUKE IWAO	21
Counting algebraic curves with tropical geometry FLORIAN BLOCK	41
Hurwitz numbers, ribbon graphs, and tropicalization PAUL JOHNSON	55
Sperner property, matroids and finite-dimensional Gorenstein algebras TOSHIAKI MAENO and YASUHIDE NUMATA	73
Block triangular bilinear forms and braid group action LEONID CHEKHOV and MARTA MAZZOCCO	85
Tropicalization method in cluster algebras TOMOKI NAKANISHI	95
An application of the max-plus spectral theory to an ultradiscrete analogue of the Lax pair SERGEÏ SERGEEV	117
A KdV cellular automaton without integers R. WILLOX, A. RAMANI, J. SATSUMA, and B. GRAMMATICOS	135
