

## Contents

|   |     |
|---|-----|
| Preface   | vii |
| Weyl Gröbner Basis Cryptosystems<br>RASHID ALI AND MARTIN KREUZER   | 1   |
| A New Look at Finitely Generated Metabelian Groups<br>GILBERT BAUMSLAG, ROMAN MIKHAILOV, AND KENT E. ORR                                      | 21  |
| <i>IA</i> -Automorphisms of Groups with Almost Constant Upper Central Series<br>MARIANNA BONANOME, MARGARET H. DEAN, AND MARCOS ZYMAN         | 39  |
| A Proposed Alternative to the Shamir Secret Sharing Scheme<br>CHI SING CHUM, BENJAMIN FINE, GERHARD ROSENBERGER,<br>AND XIAOWEN ZHANG         | 47  |
| Improving Latin Square Based Secret Sharing Schemes<br>CHI SING CHUM AND XIAOWEN ZHANG  | 51  |
| A Hand-Computation Involving Surface Groups, the Reidemeister-Schreier<br>Rewriting Process and Kurosh Subgroup Theorem<br>ANTHONY E. CLEMENT | 65  |
| Adjunction of Roots in Exponential A-Groups<br>MARGARET H. DEAN, STEPHEN MAJEWICZ, AND MARCOS ZYMAN   | 71  |
| Logspace Computations in Coxeter Groups and Graph Groups<br>VOLKER DIEKERT, JONATHAN KAUSCH, AND MARKUS LOHREY                                | 77  |
| Collection by Polynomials in Finite $p$ -groups<br>BETTINA EICK   | 95  |
| All Finite Generalized Tetrahedron Groups II<br>BENJAMIN FINE, ALEXANDER HULPKE, AND GERHARD<br>ROSENBERGER                                   | 105 |
| The Classification of One Relator Limit Groups and the Surface Group<br>Conjecture<br>BENJAMIN FINE AND GERHARD ROSENBERGER                   | 107 |
| Discrimination and Separation in the Metabelian Variety<br>ANTHONY M. GAGLIONE, SEYMOUR LIPSCHUTZ, AND DENNIS<br>SPELLMAN                     | 129 |

|  |     |
|--|-----|
| A Secret Sharing Scheme Based on Group Presentations and the Word Problem<br>MAGGIE HABEEB, DELARAM KAHROBAEI, AND VLADIMIR<br>SHPILRAIN | 143 |
| Authenticated Key Agreement with Key Re-Use in the Short Authenticated<br>Strings Model<br>STANISLAW JARECKI AND NITESH SAXENA           | 151 |
| Publicly Verifiable Secret Sharing Using Non-Abelian Groups<br>DELARAM KAHROBAEI AND ELIZABETH VIDAURRE                                  | 175 |
| A Note on the Hyperbolicity of Strict Pride Groups<br>MATTHIAS NEUMANN-BROSIG  | 181 |
| An Algorithm to Express Words as a Product of Conjugates of Relators<br>ELLEN ZILIAK   | 187 |
