Preface	vii
Plenary talks	ix
Spheres in the curve complex SPENCER DOWDALL, MOON DUCHIN, and HOWARD MASUR	1
Character varieties and moduli of quiver representations CARLOS FLORENTINO and SEAN LAWTON	9
Periodicity of asymptotic Teichmüller modular transformation EGE FUJIKAWA	39
Hyperbolization of locally compact non-complete metric spaces ZAIR IBRAGIMOV	51
Quasiregular maps and the conductivity equation in the Heisenberg group ANTON ISOPOUSSU, KIRSI PELTONEN, and JEREMY T. TYSON	61
Pushing points on pillowcase covers CHRIS JUDGE	77
Entropy of automorphisms, homology and the intrinsic polynomial structure of nilpotent groups THOMAS KOBERDA	87
Continuity of radial and two-sided radial SLE at the terminal point GREGORY F. LAWLER	101
No proper conjugation for quasiconvex cocompact groups of Gromov hyperbolic spaces KATSUHIKO MATSUZAKI and YASUHIRO YABUKI	125
A differential formula for extremal length HIDEKI MIYACHI	137
On convergence to the Denjoy-Wolff point in the parabolic case OLENA OSTAPYUK	153
Construction of a closed hyperbolic surface of arbitrarily small eigenvalue of prescribed serial number SUSOVAN PAL	161
A simple method to compute volumes of even-dimensional Coxeter polyhedra JULIEN PAUPERT	167

Some remarks about analytic functions defined on an annulus PIETRO POGGI-CORRADINI	177
On injectivity radius in configuration space and in moduli space HIROSHIGE SHIGA	183
