

## Contents

Preface	ix
List of Presenters	xi
<b>Historical Articles</b>	
Some Personal Remarks on the Radon Transform SIGURDUR HELGASON	3
On the Life and Work of S. Helgason G. ÓLAFSSON and R. J. STANTON	21
<b>Research and Expository Articles</b>	
Microlocal Analysis of an Ultrasound Transform with Circular Source and Receiver Trajectories G. AMBARTSOUMIAN, J. BOMAN, V. P. KRISHNAN, and E. T. QUINTO	45
Cuspidal discrete series for projective hyperbolic spaces NILS BYRIAL ANDERSEN and MOGENS FLENSTED-JENSEN	59
The Radon transform on $SO(3)$ : motivations, generalizations, discretization SWANHILD BERNSTEIN and ISAAC Z. PESENSON	77
Atomic decompositions of Besov spaces related to symmetric cones JENS GERLACH CHRISTENSEN	97
A double fibration transform for complex projective space MICHAEL EASTWOOD	111
Magnetic Schrödinger equation on compact symmetric spaces and the geodesic Radon transform of one forms TOMOYUKI KAKEHI	129
$F$ -method for constructing equivariant differential operators TOSHIYUKI KOBAYASHI	139
Schiffer's Conjecture, Interior Transmission Eigenvalues and Invisibility Cloaking: Singular Problem vs. Nonsingular Problem HONGYU LIU	147

Approximate Reconstruction from Circular and Spherical Mean Radon Transform Data W. R. MADYCH	155
Analytic and Group-Theoretic Aspects of the Cosine Transform G. ÓLAFSSON, A. PASQUALE, and B. RUBIN	167
Quantization of linear algebra and its application to integral geometry HIROSHI ODA and TOSHIO OSHIMA	189
Mean value theorems on symmetric spaces FRANÇOIS ROUVIÈRE	209
Semyanisty fractional integrals and Radon transforms B. RUBIN	221
Radon-Penrose transform between symmetric spaces HIDEKO SEKIGUCHI	239
Principal series representations of infinite dimensional Lie groups, II: Construction of induced representations JOSEPH A. WOLF	257
