

## Contents

|  |     |
|--|-----|
| Preface  | vii |
| Statistical Mechanics and Quantum Fields on Fractals<br>ERIC AKKERMANS   | 1   |
| Spectral Algebra of the Chernov and Bogoslovsky Finsler Metric Tensors<br>VLADIMIR BALAN   | 23  |
| Local Multifractal Analysis<br>JULIEN BARRAL, ARNAUD DURAND, STÉPHANE JAFFARD,<br>and STÉPHANE SEURET                            | 31  |
| Extreme Risk and Fractal Regularity in Finance<br>LAURENT E. CALVET and ADLAI J. FISHER  | 65  |
| An Algorithm for Dynamical Games with Fractal-Like Trajectories<br>DAVID CARFÍ and ANGELA RICCIARDELLO                           | 95  |
| The Landscape of Anderson Localization in a Disordered Medium<br>MARCEL FILOCHE and SVITLANA MAYBORODA                           | 113 |
| Zeta Functions for Infinite Graphs and Functional Equations<br>DANIELE GUIDO and TOMMASO ISOLA                                   | 123 |
| Vector Analysis on Fractals and Applications<br>MICHAEL HINZ and ALEXANDER TEPLYAEV  | 147 |
| Non-Regularly Varying and Non-Periodic Oscillation of the On-Diagonal<br>Heat Kernels on Self-Similar Fractals<br>NAOTAKA KAJINO | 165 |
| Lattice Effects in the Scaling Limit of the Two-Dimensional<br>Self-Avoiding Walk<br>TOM KENNEDY and GREGORY F. LAWLER           | 195 |
| The Casimir Effect on Laakso Spaces<br>ROBERT KESLER and BENJAMIN STEINHURST   | 211 |
| The Decimation Method for Laplacians on Fractals: Spectra and Complex<br>Dynamics<br>NISHU LAL and MICHEL L. LAPIDUS             | 227 |
| The Current State of Fractal Billiards<br>MICHEL L. LAPIDUS and ROBERT G. NIEMEYER   | 251 |

|   |     |
|---|-----|
| Long-Range Dependence and the Rank of Decompositions<br>CÉLINE LÉVY-LEDUC and MURAD S. TAQQU  | 289 |
| Hitting Probabilities of the Random Covering Sets<br>BING LI, NARN-RUEIH SHIEH, and YIMIN XIAO  | 307 |
| Fractal Oscillations Near the Domain Boundary of Radially Symmetric<br>Solutions of $p$ -Laplace Equations<br>YŪKI NAITO, MERVAN PAŠIĆ, SATOSHI TANAKA,<br>and DARKO ŽUBRINIĆ | 325 |
| Applications of the Contraction Mapping Principle<br>JOHN R. QUINN  | 345 |
| Economics and Psychology. Perfect Rationality versus Bounded Rationality<br>DANIELE SCHILIRÒ  | 359 |
