

Contents

Editors' preface	ix
Topics in real and complex number complexity theory MARTIJN BAARTSE and KLAUS MEER	1
Polar, bipolar and copolar varieties: Real solving of algebraic varieties with intrinsic complexity BERND BANK, MARC GIUSTI, and JOOS HEINTZ	55
The complexity and geometry of numerically solving polynomial systems CARLOS BELTRÁN and MICHAEL SHUB	71
Multiplicity hunting and approximating multiple roots of polynomial systems M. GIUSTI and J.-C. YAKOUBSOHN	105
On the intrinsic complexity of elimination problems in effective algebraic geometry JOOS HEINTZ, BART KUIJPERS, and ANDRÉS ROJAS PAREDES	129
Newton iteration, conditioning and zero counting GREGORIO MALAJOVICH	151
