

Contents

Preface	vii
In memory of Grigory Litvinov	ix
Tropical Cramer determinants revisited MARIANNE AKIAN, STÉPHANE GAUBERT, and ALEXANDER GUTERMAN	1
An approximation of Hopf-Lax type formula via idempotent analysis ANTONIO AVANTAGGIATI and PAOLA LORETI	47
Ideals of MV-semirings and MV-algebras L. P. BELLUCE, A. DI NOLA, and A. R. FERRAIOLI	59
Tropical Plücker functions and Kashiwara crystals V. I. DANILOV, A. V. KARZANOV, and G. A. KOSHEVOY	77
A metric on max-min algebra JONATHAN ESKELDSON, MIRIAM JAFFE, and VIOREL NITICA	101
Optimization on the range of a max-separable operator MARTIN GAVALEC and KAREL ZIMMERMANN	115
Algebraic structures of tropical mathematics ZUR IZHAKIAN, MANFRED KNEBUSCH, and LOUIS ROWEN	125
Parametric dequantization, tropical reduction of hyperfields and steady states of AC electrical networks B. KH. KIRSHEIN	151
A constrained tropical optimization problem: Complete solution and application example NIKOLAI KRIVULIN	163
On the mathematical foundations of classical thermodynamics VIKTOR P. MASLOV	179
Tropical support sets in analysis of weak links and complementarity VLADIMIR MATVEENKO	211
Idempotent algebra models of single-agent and multi-agent dynamics DMITRY NIKOLAYEV	221
Tropical convexity over max-min semiring VIOREL NITICA and SERGEÏ SERGEEV	241

Tropicalization and tropical equilibration of chemical reactions VINCENT NOEL, DIMA GRIGORIEV, SERGEI VAKULENKO, and OVIDIU RADULESCU	261
An overview of transience bounds in max-plus algebra THOMAS NOWAK and BERNADETTE CHARRON-BOST	277
Strong independence and injectivity in tropical modules EDOUARD WAGNEUR	291
