Preface	vii
On algebraic properties of the spectrum and spectral radius of elements in a unital algebra MART ABEL	1
Automatic continuity of surjective homomorphisms between topological algebras MATI ABEL	13
Characterization of holomorphic and meromorphic functions via maximum principles JOHN ANDERSON	23
Hermitian operators on $\mathbf{H}_{\mathcal{H}}^p(\Delta^n)$ FERNANDA BOTELHO and JAMES JAMISON	29
Some notions of transitivity for operator spaces JAVIER ALEJANDRO CHÁVEZ-DOMÍNGUEZ and TIMUR OIKHBERG	49
Removability of exceptional sets for differentiable and Lipschitz functions J. CRAIG, J. F. FEINSTEIN, and P. PATRICK	63
Generalizing trigonometric functions from different points of view DAVID E. EDMUNDS and JAN LANG	69
Partial W^* -dynamical systems and their dilations G. O. S. EKHAGUERE	83
Swiss cheeses and their applications J. F. FEINSTEIN, S. MORLEY, and H. YANG	99
Isometries on the special unitary group OSAMU HATORI	119
Amenability as a hereditary property in some algebras of vector-valued functions TERJE HÖIM and D. A. ROBBINS	135
Weighted norm inequalities for Hardy type operators on monotone functions PANKAJ JAIN, MONIKA SINGH, and ARUN PAL SINGH	145
Norms on normal function algebras KRZYSZTOF JAROSZ	161

Maximally modulated singular integral operators and their applications to pseudodifferential operators on Banach function spaces ALEXEI YU. KARLOVICH	165
Smoothness to the boundary of biholomorphic mappings: An overview STEVEN G. KRANTZ	179
A multiplicative Banach-Stone theorem KRISTOPHER LEE	191
Weighted composition operators on weighted sequence spaces DOAN MINH LUAN and LE HAI KHOI	199
Spectral isometries into commutative Banach algebras MARTIN MATHIEU and MATTHEW YOUNG	217
Eigenvalues and eigenfunctions of the $p(\cdot)$ -Laplacian. A convergence analysis OSVALDO MÉNDEZ	223
Surjective isometries between function spaces TAKESHI MIURA	231
Endomorphisms and the Šilov representation D. C. MOORE	241
The essential norm of operators on the Bergman space of vector-valued functions on the unit ball ROBERT RAHM and BRETT D. WICK	249
Trigonometric approximation of periodic functions belonging to weighted Lipschitz class $W(L^p, \Psi(t), \beta)$ SHAILESH KUMAR SRIVASTAVA and UADAY SINGH	283
Analytic structure of polynomial hulls JOHN WERMER	293
