

## Contents

Preface	vii
Symmetries, Hopf fibrations and supercritical elliptic problems MÓNICA CLAPP and ANGELA PISTOIA	1
Min-max theory of minimal surfaces and applications FERNANDO C. MARQUES and ANDRÉ NEVES	13
Homogenization on manifolds GONZALO CONTRERAS	27
Lagrangian cobordism: Rigidity and flexibility aspects OCTAV CORNEA	41
Biochemical reaction networks: An invitation for algebraic geometers ALICIA DICKENSTEIN	65
Long-time asymptotic expansions for nonlinear diffusions in Euclidean space JOCHEN DENZLER, HERBERT KOCH, and ROBERT J. MCCANN	85
Non-strongly isospectral spherical space forms E. A. LAURET, R. J. MIATELLO, and J. P. ROSSETTI	95
Entrance laws for positive self-similar Markov processes VÍCTOR RIVERO	119
Combinatorics and geometry FERNANDO RODRIGUEZ-VILLEGAS	141
A (short) survey on dominated splittings M. SAMBARINO	149
Geometric regularity estimates for elliptic equations EDUARDO V. TEIXEIRA	185
