Preface	vii
Björn David Jawerth (1952–2013) MICHAEL CWIKEL, MICHAEL FRAZIER, LOUISE M. JAWERTH, and MARIO MILMAN	1
Jawerth–Milman extrapolation theory: Some recent developments with applications SERGEY V. ASTASHKIN and KONSTANTIN V. LYKOV	7
Uncertainty principles and weighted norm inequalities JOHN J. BENEDETTO and MATTHEW DELLATORRE	55
The discrete Calderón reproducing formula of Frazier and Jawerth ÁRPÁD BÉNYI and RODOLFO H. TORRES	79
A characterisation of the Besov-Lipschitz and Triebel-Lizorkin spaces using Poisson like kernels HUY-QUI BUI and TIMOTHY CANDY	109
An approximation problem in multiplicatively invariant spaces C. CABRELLI, C. A. MOSQUERA, and V. PATERNOSTRO	143
Discrete decomposition of homogeneous mixed-norm Besov spaces G. CLEANTHOUS, A. G. GEORGIADIS, and M. NIELSEN	167
From Frazier-Jawerth characterizations of Besov spaces to wavelets and decomposition spaces H. G. FEICHTINGER and F. VOIGTLAENDER	185
Traces and extensions of weighted Sobolev and potential spaces MICHAEL FRAZIER and SVETLANA ROUDENKO	217
Compact embeddings of weighted smoothness spaces of Morrey type: An example DOROTHEE D. HAROSKE and LESZEK SKRZYPCZAK	235
Tracking the structural deformation of a sheared biopolymer network LOUISE M. JAWERTH and DAVID A. WEITZ	255
Extrapolation, a technique to estimate LÁSZLÓ LEMPert	271

On a dual property of the maximal operator on weighted variable $L^p$ spaces ANDREI K. LERNER	283
Is the Dirichlet space a quotient of $DA_n$ ? RICHARD ROCHBERG	301
Characterizations of the Hardy space $H^1(\mathbb{R})$ and $BMO(\mathbb{R})$ WAEEL ABU-SHAMMALA, JI-LIANG SHIU, and ALBERTO TORCHINSKY	309
Four proofs of cocompactness for Sobolev embeddings CYRIL TINTAREV	321
Tempered homogeneous function spaces, II HANS TRIEBEL	331
Isotropic and dominating mixed Besov spaces: A comparison VAN KIEN NGUYEN and WINFRIED SICKEL	363
An iteratively reweighted least squares algorithm for sparse regularization SERGEY VORONIN and INGRID DAUBECHIES	391
