

Contents

Preface	vii
Combined list of speakers	ix
Blowup rate for mass critical rotational nonlinear Schrödinger equations NYLA BASHARAT, YI HU, and SHIJUN ZHENG	1
Gradient estimates for weak solutions of linear elliptic systems with singular-degenerate coefficients DAT CAO, TADELE MENGESHA, and TUOC PHAN	13
Virial estimates for hard spheres RYAN DENLINGER	35
The almost global existence to classical solution for a 3-D wave equation of nematic liquid-crystals YI DU, GENG CHEN, and JIANLI LIU	53
Instability of solitons–revisited, I: The critical generalized KdV equation LUIZ GUSTAVO FARAH, JUSTIN HOLMER, and SVETLANA ROUDENKO	65
Instability of solitons–revisited, II: The supercritical Zakharov-Kuznetsov equation LUIZ GUSTAVO FARAH, JUSTIN HOLMER, and SVETLANA ROUDENKO	89
Stabilization of dispersion-generalized Benjamin-Ono CYNTHIA FLORES, SEUNGLY OH, and DEREK SMITH	111
Uniqueness of standing-waves for a non-linear Schrödinger equation with three pure-power combinations in dimension one DANIELE GARRISI and VLADIMIR GEORGIEV	137
Below-threshold solutions of a focusing energy-critical heat equation in \mathbb{R}^4 STEPHEN GUSTAFSON and DIMITRIOS ROXANAS	149
A regularity upgrade of pressure DONG LI and XIAOYI ZHANG	163
On large future-global-in-time solutions to energy-supercritical nonlinear wave equation SHUANG MIAO	187
The nonlinear Schrödinger equation with an inverse-square potential JASON MURPHY	215

The harmonic map heat flow on conic manifolds YUANZHEN SHAO and CHANGYOU WANG	227
On the global regularity issue of the two-dimensional magnetohydrodynamics system with magnetic diffusion weaker than a Laplacian KAZUO YAMAZAKI	251
Orbital stability of standing waves for fractional Hartree equation with unbounded potentials JIAN ZHANG, SHIJUN ZHENG, and SHIHUI ZHU	265
