

Contents

Preface	vii
Plenary talks	ix
Parallel talks	xi
The α -family in the $K(2)$ -local sphere at the prime 2 AGNÈS BEAUDRY	1
A constructive approach to higher homotopy operations DAVID BLANC, MARK W. JOHNSON, and JAMES M. TURNER	21
The right adjoint to the equivariant operadic forgetful functor on incomplete Tambara functors ANDREW J. BLUMBERG and MICHAEL A. HILL	75
The centralizer resolution of the $K(2)$ -local sphere at the prime 2 HANS-WERNER HENN	93
Galois descent criteria J. F. JARDINE	129
Quantization of the modular functor and equivariant elliptic cohomology NITU KITCHLOO	157
Calculating obstruction groups for E_∞ ring spectra TYLER LAWSON	179
Comodules, sheaves, and the exact functor theorem HAYNES MILLER	205
Complex orientations for THH of some perfectoid fields JACK MORAVA	221
String bordism and chromatic characteristics MARKUS SZYMIK	239
Mahowald square and Adams differentials ZHOULI XU	255
