

Contents

Preface	v
List of Participants	vii
On isonoetherian and isoartinian modules ALBERTO FACCHINI and ZAHRA NAZEMIAN	1
Derived categories for Grothendieck categories of enriched functors GRIGORY GARKUSHA and DARREN JONES	23
Left determined morphisms and free realisations LORNA GREGORY	47
The universal abelian regular ring IVO HERZOG and SONIA L'INNOCENTE	57
A characterisation of τ -tilting finite algebras LIDIA ANGELERI-HÜGEL, FREDERIK MARKS, and JORGE VITÓRIA	75
Describing models of $\text{Th}(\mathbb{Z})$ in adelic terms ANGUS MACINTYRE	91
Valued modules on skew polynomial rings and Bézout domains FRANÇOISE POINT	97
Multisorted modules and their model theory MIKE PREST	115
Pure projective modules over non-singular serial rings PAVEL PŘÍHODA	153
Mittag-Leffler modules and definable subcategories PHILIPP ROTHMALER	171
Intrinsic valuation entropy LUIGI SALCE and SIMONE VIRILI	197
Decidability and modules over Bézout domains CARLO TOFFALORI	223
