

## Contents

Preface	vii
<b>Part I. The Topology and Geometry of DNA</b>	
Beyond the static DNA model of Watson and Crick JONATHAN M. FOGG and LYNN ZECHIEDRICH	3
Characterizing the topology of kinetoplast DNA using random knotting P. LIU, R. POLISCHUK, Y. DIAO, and J. ARSUAGA	17
Did sequence dependent geometry influence the evolution of the genetic code? ALEX KASMAN and BRENTON LEMESURIER	41
Topological sum rules in the knotting probabilities of DNA TETSUO DEGUCHI and ERICA UEHARA	57
Knotting of replication intermediates is narrowly restricted DOROTHY BUCK and DANIELLE O'DONNOL	85
Recent advances on the non-coherent band surgery model for site-specific recombination ALLISON H. MOORE and MARIEL VAZQUEZ	101
<b>Part II. The Topology and Geometry of Proteins</b>	
Why are there knots in proteins? SOPHIE E. JACKSON	129
Knotted proteins: Tie etiquette in structural biology ANA NUNES and PATRÍCIA F. N. FAÍSCA	155
Knotoids and protein structure DIMOS GOUNDAROULIS, JULIEN DORIER, and ANDRZEJ STASIAK	185
Topological linking and entanglement in proteins KENNETH C. MILLETT	201
A topological study of protein folding kinetics ELENI PANAGIOTOU and KEVIN W. PLAXCO	223
