

Contents

Preface	vii
List of Speakers	ix
The open dihypergraph dichotomy and the second level of the Borel hierarchy RAPHAËL CARROY, BENJAMIN D. MILLER, AND DÁNIEL T. SOUKUP	1
An introduction to combinatorics of determinacy WILLIAM CHAN	21
Isomorphism and weak conjugacy of free Bernoulli subflows JOHN D. CLEMENS	77
Distance from marker sequences in locally finite Borel graphs CLINTON T. CONLEY AND ANDREW S. MARKS	89
The Ultrapower Axiom GABRIEL GOLDBERG	93
Quasi-invariant measures for continuous group actions ALEXANDER S. KECHRIS	113
An example of a new simple theory M. MALLIARIS AND S. SHELAH	121
A brief introduction to amenable equivalence relations JUSTIN TATCH MOORE	153
Singularizing cardinals DIMA SINAPOVA	165
A brief account of recent developments in inner model theory NAM TRANG	175
A descriptive construction of trees and Stallings' theorem ANUSH TSERUNYAN	191
