

Contents

Preface	vii
Speakers and members of the organizing committee	xi
List of participants	xiii
Part I: Surveys	
Archimedean zeta functions and oscillatory integrals EDWIN LEÓN-CARDENAL	3
Generalized Poincaré series for plane curve singularities JULIO JOSÉ MOYANO-FERNÁNDEZ	25
Introduction to p -adic Igusa zeta functions NAUD POTEMANS and WILLEM VEYS	71
An introduction to p -adic and motivic integration, zeta functions and invariants of singularities JUAN VIU-SOS	103
p -adic analysis: a quick introduction WILSON A. ZÚÑIGA-GALINDO	177
Part II: Articles	
On maximal order poles of generalized topological zeta functions ENRIQUE ARTAL BARTOLO and MANUEL GONZÁLEZ VILLA	225
Local invariants of minimal generic curves on rational surfaces JOSÉ IGNACIO COGOLLUDO-AGUSTÍN, TAMÁS LÁSZLÓ, JORGE MARTÍN-MORALES, and ANDRÁS NÉMETHI	231
Motivic Poincaré series of cusp surface singularities JÁNOS NAGY and ANDRÁS NÉMETHI	259
Non-archimedean electrostatics CHRISTOPHER D. SINCLAIR	279
