

Contents

Preface	ix
Notation	xi
Part I. Christoffel Words	1
Chapter 1. Christoffel Words	5
1. Geometric definition	5
2. Cayley graph definition	7
Chapter 2. Christoffel Morphisms	9
1. Christoffel morphisms	9
2. Generators	14
Chapter 3. Standard Factorization	17
1. The standard factorization	17
2. The Christoffel tree	20
Chapter 4. Palindromization	23
1. Christoffel words and palindromes	23
2. Palindromic closures	24
3. Palindromic characterization	29
Chapter 5. Primitive Elements in the Free Group F_2	33
1. Positive primitive elements of the free group	33
2. Positive primitive characterization	34
Chapter 6. Characterizations	39
1. The Burrows – Wheeler transform	39
2. Balanced ₁ Lyndon words	41
3. Balanced ₂ Lyndon words	41
4. Circular words	42
5. Periodic phenomena	44
Chapter 7. Continued Fractions	47
1. Continued fractions	47
2. Continued fractions and Christoffel words	48
3. The Stern – Brocot tree	52
Chapter 8. The Theory of Markoff Numbers	55
1. Minima of binary quadratic forms	55
2. Markoff numbers	56

3. Markoff's condition	58
4. Proof of Markoff's theorem	61
Part II. Repetitions in Words	65
Chapter 1. The Thue–Morse Word	69
1. The Thue–Morse word	69
2. The Thue–Morse morphism	70
3. The Tarry–Escott problem	71
4. Magic squares	74
Chapter 2. Combinatorics of the Thue–Morse Word	77
1. Automatic sequences	77
2. Generating series	79
3. Overlaps	81
4. Complexity	82
5. Formal languages	85
6. The Tower of Hanoi	90
Chapter 3. Square-Free Words	97
1. One example, three constructions	97
2. Square-free morphisms and codes	100
3. A 3-square-free test for square-freeness	102
4. A 2-square-free test for square-freeness	105
Chapter 4. Squares in Words	107
1. Counting squares	107
2. Centered squares	111
3. Prefix arrays	112
4. Crochemore factorization	114
5. Suffix trees	116
Chapter 5. Repetitions and Patterns	125
1. Maximal repetitions	125
2. Repetition thresholds	126
3. Patterns	127
4. Zimin patterns	131
5. Bi-ideal sequences	133
6. Repetitions in Sturmian words	134
Bibliography	135
Index	143
