

Contents

Preface	vii
Support Vector Machines and Distance Minimization <i>Emilio Carrizosa</i>	1
0-1 Semidefinite Programming for Graph-Cut Clustering: Modelling and Approximation <i>Huarong Chen and Jiming Peng</i>	15
Artificial Attributes in Analyzing Biomedical Databases <i>Zsolt Csizmadia, Peter L. Hammer, and Béla Vizvári</i>	41
Recent Advances in Mathematical Programming for Classification and Cluster Analysis <i>Ya-Ju Fan, Cem Iyigun, and W. Art Chaovalitwongse</i>	67
Nonlinear Skeletons of Data Sets and Applications—Methods Based on Subspace Clustering <i>Pando G. Georgiev</i>	95
Current Classification Algorithms for Biomedical Applications <i>Mario R. Guarracino, Salvatore Cuciniello, Davide Feminiano, Gerardo Toraldo, and Panos M. Pardalos</i>	109
Bilevel Model Selection for Support Vector Machines <i>Gautam Kunapuli, Kristin P. Bennett, Jing Hu, and Jong-Shi Pang</i>	129
Algorithms for Detecting Complete and Partial Horizontal Gene Transfers: Theory and Practice <i>Vladimir Makarenkov, Alix Boc, Alpha Boubacar Diallo, and Abdoulaye Baniré Diallo</i>	159
Nonlinear Knowledge in Kernel Machines <i>Olvi L. Mangasarian and Edward W. Wild</i>	181
Ultrametric Embedding: Application to Data Fingerprinting and to Fast Data Clustering <i>Fionn Murtagh</i>	199
Selective Linear and Nonlinear Classification <i>Onur Seref, O. Erhun Kundakcioglu, and Panos M. Pardalos</i>	211
