

Contents

Preface	vii
A Self-Contained Proof of the Strong-Type Capacitary Inequality for the Dirichlet Space <i>Omar El-Fallah, Karim Kellay, Javad Mashreghi, and Thomas Ransford</i>	1
A Simple Numerical Approach to the Riemann Hypothesis <i>N. Tarkhanov</i>	21
A Survey of Linear Extremal Problems in Analytic Function Spaces <i>Catherine Bénéteau and Dmitry Khavinson</i>	33
A Unifying Construction for Measure-Valued Continuous and Discrete Branching Processes <i>Lucian Beznea, Oana Lupaşcu, and Andrei-George Oprina</i>	47
Compactifications of the Plane and Extensions of the Disc Algebra <i>V. Nestoridis</i>	61
Examples of Quantitative Universal Approximation <i>Thomas Kalmes, Markus Nieß, and Thomas Ransford</i>	77
Harmonic Mappings with Quadrilateral Image <i>Jane McDougall</i>	99
Hartogs Phenomenon on Unbounded Domains—Conjectures and Examples <i>Al Boggess, Roman J. Dzwilewicz, and Zbigniew Ślodkowski</i>	117
Integration Formulae and Kernels in Singular Subvarieties of \mathbb{C}^n <i>Luis M. Hernández-Pérez and Eduardo S. Zeron</i>	135
Invariant Potential Theory, Derivatives of Inner Functions, and $B^{p,q}$ Spaces in the Unit Ball of \mathbb{C}^n <i>Manfred Stoll</i>	149
Logarithmic Hölder Estimates of p -Harmonic Extension Operators in a Metric Measure Space <i>Tsubasa Itoh</i>	163
Meromorphic Approximation on Noncompact Riemann Surfaces <i>Nadya Askaripour and André Boivin</i>	171
On a Family of Outer Functions <i>Javad Mashreghi</i>	193

On C^m -Subharmonic Extension Sets of Walsh-Type <i>P. V. Paramonov</i>	201
On Maximal Plurisubharmonic Functions <i>A. Sadullaev</i>	211
On Universality of Series in Banach Spaces <i>Richard Fournier and Jérôme-Melville Giguère</i>	217
Orlicz Capacity of Balls <i>Yoshihiro Mizuta and Takao Ohno</i>	225
Potential Analysis on Nonsmooth Domains—Martin Boundary and Boundary Harnack Principle <i>Hiroaki Aikawa</i>	235
Potential Theory on Trees and Multiplication Operators <i>David Singman</i>	255
Recent Progress on Fine Differentiability and Fine Harmonicity <i>Stephen J. Gardiner</i>	283
Reversibility Questions in Groups Arising in Analysis <i>Anthony G. O'Farrell</i>	293
Subordinate Harmonic Structures in an Infinite Network <i>Victor Anandam</i>	301
The Generalized Binomial Theorem <i>Murali Rao</i>	315
Uniform and C^m -Approximation by Polyanalytic Polynomials <i>Konstantin Yu. Fedorovskiy</i>	323
