

Contents

Preface	vii
Dedication	ix
Acknowledgments	xi
Part 1: Homotopy Theory	1
Introduction	3
Construction of universal bundles, I (1956)	7
Construction of universal bundles, II (1956)	21
The geometric realization of a semi-simplicial complex (1957)	29
On spaces having the homotopy type of a CW-complex (1959)	35
On the construction <i>FK</i> (1955/1972)	45
Part 2: Cohomology and homology	55
Introduction	57
The Steenrod algebra and its dual (1958)	61
On the Steenrod homology theory (1961/1995)	83
On axiomatic homology theory (1962)	101
An example of anomalous singular homology (1962) WITH M. G. BARRATT	107
Semi-characteristics and cobordism (1969) WITH G. LUSZTIG AND F. P. PETERSON	113
On the homology of Lie groups made discrete (1983)	117
Part 3: Manifolds	131
Introduction	133
On the immersion of n -manifolds in $(n + 1)$ -space (1956)	141

On simply connected 4-manifolds (1958)	151
On 2-spheres in 4-manifolds (1961) WITH MICHEL KERVAIRE	159
Two remarks on fiber homotopy type (1960) WITH EDWIN SPANIER	167
Microbundles and differentiable structures* (1961)	173
Topological manifolds and smooth manifolds (1963)	191
Microbundles. Part I (1964)	199
On characteristic classes for spherical fibre spaces (1968)	227
Part 4: Expository Papers	255
Introduction	257
The work of J. H. C. Whitehead (1962)	261
Foliations and foliated vector bundles* (1970)	279
The work of M. H. Freedman (1986)	321
Towards the Poincaré conjecture and the classification of 3-manifolds (2003)	325
The Poincaré conjecture one hundred years later (2006)	337
Fifty years ago: Topology of manifolds in the 50's and 60's (2006)	345
Bibliography	357
Index of Symbols	363
Main Index	365
