

Table of Contents for CWORKS/24

Collected Works of John Tate

Part I

- Fourier analysis in number fields and Hecke's zeta-functions
by J. T. Tate
- A note on finite ring extensions
by Emil Artin; John T. Tate
- On the relation between extremal points of convex sets and homomorphisms of algebras
by John Tate
- Genus change in inseparable extensions of function fields
by John Tate
- On Chevalley's proof of Luroth's theorem
by Serge Lang; John Tate
- The higher dimensional cohomology groups of class field theory
by John Tate
- The cohomology groups of algebraic number fields
by John T. Tate
- On the Galois cohomology of unramified extensions of function fields in one variable
by Y. Kawada; J. Tate
- On the characters of finite groups
by Richard Brauer; John Tate
- Homology of Noetherian rings and local rings
by John Tate
- WC-groups over p -adic fields
by John Tate
- On the inequality of Castelnuovo-Severi
by Emil Artin; John Tate
- On the inequality of Castelnuovo-Severi, and Hodge's theorem
by John Tate
- Principal homogeneous spaces over abelian varieties
by Serge Lang; John Tate
- Principal homogeneous spaces for abelian varieties
by John Tate
- A different with an odd class
by A. Fröhlich; J.-P. Serre; J. Tate
- Nilpotent quotient groups
by John Tate
- Duality theorems in Galois cohomology over number fields
by John Tate
- Ramification groups of local fields
by Shankar Sen; John Tate
- Formal complex multiplication in local fields
by Jonathan Lubin; John Tate
- Algebraic cycles and poles of zeta functions
by John T. Tate
- Elliptic curves and formal groups
by J. Lubin; J. Serre; J. Tate
- On the conjectures of Birch and Swinnerton-Dyer and a geometric analog
by John Tate

- Formal moduli for one-parameter formal Lie groups
by Jonathan Lubin; John Tate
- The cohomology groups of tori in finite Galois extensions of number fields
by John Tate
- Global class field theory
by J. T. Tate
- Endomorphisms of abelian varieties over finite fields
by John Tate
- The rank of elliptic curves
by J. T. Tate; I. R. Šafarevič
- Residues of differentials on curves
by John Tate
- p -divisible groups
by J. T. Tate
- The work of David Mumford
by J. Tate
- Classes d'isogenie des variétés abéliennes sur un corps fini (d'après T. Honda)
by John Tate
- Good reduction of abelian varieties
by Jean-Pierre Serre; John Tate
- Group schemes of prime order
by John Tate; Frans Oort
- Symbols in arithmetic
by John Tate
- Rigid analytic spaces
by John Tate
- The Milnor ring of a global field
by H. Bass; J. Tate
- Appendix
by H. Bass; J. Tate
- Letter from Tate to Iwasawa on a relation between K_2 and Galois cohomology
by J. Tate
- Points of order 13 on elliptic curves
by B. Mazur; J. Tate
- The arithmetic of elliptic curves
by John T. Tate
- The 1974 Fields Medals (I): An algebraic geometer
by J. Tate
- Algorithm for determining the type of a singular fiber in an elliptic pencil
by J. Tate
- Letters
by John Tate

- Problem 9: The general reciprocity law
by J. Tate
- Relations between K_2 and Galois cohomology
by John Tate
- Local constants
by J. T. Tate
- On the torsion in K_2 of fields
by J. Tate
- Fields medals (IV): An instinct for the key idea
by John Tate
- A simple proof of the main theorem of elimination theory in algebraic geometry

- by P. Cartier; J. Tate
- Number theoretic background
by John Tate
- The Harish-Satake transform on GL_r
by J. Tate
- Brumer-Stark-Stickelberger
by John Tate
- On conjugation of abelian varieties of CM type
by John Tate
- On Stark's conjectures on the behavior of $L(s, \chi)$ at $s=0$
by John Tate
- Variation of the canonical height of a point depending on a parameter
by J. Tate
- A reciprocity law for K_2 -traces
by Shmuel Rosset; John Tate
- Canonical height pairings via Biextensions
by B. Mazur; J. Tate
- On p -adic analogues of the conjectures of Birch and Swinnerton-Dyer
by B. Mazur; J. Tate; J. Teitelbaum
- Refined conjectures of the “Birch and Swinnerton-Dyer type”
by B. Mazur; J. Tate
- Commentary on algebra
by B. Gross; J. Tate
- Some algebras associated to automorphisms of elliptic curves
by M. Artin; J. Tate; M. Van den Bergh
- The p -adic sigma function
by B. Mazur; J. Tate
- Quantum deformations of GL_n
by Michael Artin; William Schelter; John Tate
- Modules over regular algebras of dimension 3
by M. Artin; J. Tate; M. Van den Bergh
- Conjectures on algebraic cycles in ℓ -adic cohomology
by John Tate
- The center of the 3-dimensional and 4-dimensional Sklyanin algebras
by S. P. Smith; J. Tate
- The non-existence of certain Galois extensions of \mathbb{Q} unramified outside 2
by John Tate
- The centers of 3-dimensional Sklyanin algebras
by Michael Artin; William Schelter; John Tate
- A review of non-Archimedean elliptic functions
by John Tate
- Homological properties of Sklyanin algebras
by John Tate; Michel Van den Bergh
- Linear forms in p -adic roots of unity
by John Tate; José Felipe Voloch
- Finite flat group schemes
by John Tate
- Bernard Dwork (1923-1998)
by Nicholas M. Katz; John Tate
- Galois cohomology
by John Tate
- On a conjecture of Finotti
by John Tate
- Refining Gross's conjecture on the values of abelian L -functions

- by John Tate
- On the Jacobians of plane cubics
by Michael Artin; Fernando Rodriguez-Villegas; John Tate
 - Computation of p -adic heights and log convergence
by Barry Mazur; William Stein; John Tate
 - Letters
by John Tate
