Foreword	
PATRICIA HERSH, THOMAS LAM, PAVLO PYLYAVSKYY, and VICTOR REINER	vii
Permissions & Acknowledgments	ix
Richard Stanley's Short Curriculum Vitae	xiii
Photos	xvii
The early years	1
How the Upper Bound Conjecture was proved	3
Theory and application of plane partitions: part 1	11
Theory and application of plane partitions: part 2	33
Modular elements of geometric lattices	55
Supersolvable lattices	59
Linear homogeneous Diophantine equations and magic labelings of graphs	81
Acyclic orientations of graphs	107
Combinatorial reciprocity theorems	115
The Upper Bound Conjecture and Cohen-Macaulay rings	175
Combinatorial reciprocity theorems	183
Binomial posets, Möbius inversion, and permutation enumeration	195
Eulerian partitions of a unit hypercube	217
Hilbert functions of graded algebras	219
The number of faces of a simplicial convex polytope	247
Differentiably finite power series	251
Weyl groups, the hard Lefschetz theorem, and the Sperner property	265
Two combinatorial applications of the Aleksandrov-Fenchel inequalities	283
Linear Diophantine equations and local cohomology	293
Some aspects of groups acting on finite posets	313

(with Anders Björner and Adriano M. Garsia) An introduction to Cohen-Macaulay partially ordered sets	343
An introduction to combinatorial commutative algebra	375
On the number of reduced decompositions of elements of Coxeter groups	391
A baker's dozen of conjectures concerning plane partitions	405
Unimodality and Lie superalgebras	415
Two poset polytopes	435
Generalized $H$ -vectors, intersection cohomology of toric varieties, and related results	451
Differential posets	479
Log-concave and unimodal sequences in algebra, combinatorics, and geometry	523
Some combinatorial properties of Jack symmetric functions	559
Subdivisions and local $h$ -vectors	599
(with Sara Billey and William Jockusch) Some combinatorial properties of Schubert polynomials	647
(with Sergey Fomin) Schubert polynomials and the nilCoxeter algebra	677
Flag $f$ -vectors and the $cd$ -index	689
A symmetric function generalization of the chromatic polynomial of a graph	707
Irreducible symmetric group characters of rectangular shape	737
Increasing and decreasing subsequences and their variants	749
Promotion and evacuation	785
A conjectured combinatorial interpretation of the normalized irreducible character values of the symmetric group	809
