

Contents

Foreword	ix
Preface	xi
Depth functions in nonparametric multivariate inference ROBERT SERFLING	1
Rank tests for multivariate scale difference based on data depth REGINA Y. LIU and KESAR SINGH	17
On scale curves for nonparametric description of dispersion JIN WANG and ROBERT SERFLING	37
Data analysis and classification with the zonoid depth KARL MOSLER and RICHARD HOBERG	49
On some parametric, nonparametric and semiparametric discrimination rules ANTTI HARTIKAINEN and HANNU OJA	61
Regression depth and support vector machine ANDREAS CHRISTMANN	71
Spherical data depth and a multivariate median RYAN T. ELMORE, THOMAS P. HETTMANSPERGER, and FENGJUAN XUAN	87
Depth-based classification for functional data SARA LÓPEZ-PINTADO and JUAN ROMO	103
Impartial trimmed means for functional data JUAN ANTONIO CUESTA-ALBERTOS and RICARDO FRAIMAN	121
Geometric measures of data depth GREG ALOUPIS	147
Computation of half-space depth using simulated annealing BIMAN CHAKRABORTY and PROBAL CHAUDHURI	159
Primal-dual algorithms for data depth DAVID BREMNER, KOMEI FUKUDA, and VERA ROSTA	171
Simplicial depth: An improved definition, analysis, and efficiency for the finite sample case MICHAEL A. BURR, EYNAT RAFALIN, and DIANE L. SOUVAINE	195

Fast algorithms for frames and point depth JOSÉ H. DULÁ	211
Statistical data depth and the graphics hardware SHANKAR KRISHNAN, NABIL H. MUSTAFA, and SURESH VENKATASUBRAMANIAN	223
