

Contents

Foreword	vii
Preface	
A. B. GUMEL and S. LENHART	xi
Prologue	
S. LEVIN	xiii
Introduction to Mathematical Modeling of Infectious Diseases	
S. SHRESTHA and J. O. LLOYD-SMITH	1
Tools for Mathematical Epidemiology	
E. M. LUNGU, M. KGOSIMORE, and F. NYABADZA	47
An Introduction to Optimal Control with an Application in Disease Modeling	
R. MILLER NEILAN and S. LENHART	67
Introduction to Discrete-time Epidemic Models	
A.-A. YAKUBU	83
Introduction to Optimal Control for Discrete Time Models with an Application to Disease Modeling	
W. DING and S. LENHART	109
Incorporating Stochasticity in Simple Models of Disease Spread	
J. DUSHOFF	121
Using Mathematical Models to Monitor and Evaluate the Impact of Public Health Interventions on Epidemics: The Case of the TB/HIV Co-pandemic in Africa	
M. S. SÁNCHEZ, J. O. LLOYD-SMITH, B. G. WILLIAMS, and W. M. GETZ	135
Modelling the Epidemiological and Economic Impact of HIV/AIDS with Particular Reference to Zimbabwe	
S. D. HOVE-MUSEKWA, V. RUNYOWA, and Z. MUKANDAVIRE	187
Mathematical Analysis of HIV Treatment Model with Variable Viral Load and Infection Stages	
O. SHAROMI and A. B. GUMEL	209
Greedy Algorithms in Economic Epidemiology	
F. S. ROBERTS	249
